

Space and Climate

By Josef Kemény 19/03/2022

We often say that history repeats itself. The Earth has experienced its climate history, known in world history, religion, and science. Let us go back in time to see what happened in the US in 1983.

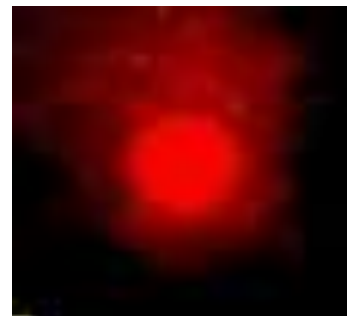

This is what they wrote in the US:

We bring it up once again since it is the most popular item on the Internet. It introduced a statement by some NASA scientists and collected data from the IRAS, the infra-red astronomical satellite, which was launched in 1983. There was an article in the Washington Post on December 30 headlined: 'Maybe as large as Jupiter, a mysterious celestial body has been discovered.' Written by Thomas O'Toole.

As early as in 1983 there was information in the US that planet X had been discovered. The discovery evidently follows the space programs and research connected to the STS and, later, the ISS. The IRAS satellite which discovered the neutron star Nemesis was produced by NASA/the US, the Netherlands, and Great Britain.

We often say that history repeats itself. Nemesis is back after around 3,666 years. December 4, 2015: As the winter sun is setting beyond the city of Tarakan i northern Indonesia, a photographer takes this incredible picture. The planet is as large as Jupiter. Even NASA has now acknowledged the return of Nemesis. The Netherlands and Great Britain agree. Here we have the origin of global warming and climate change.

The UN Climate Change Conference in Glasgow, Scotland 01/11/2021 – 15/11/2021.

James Bond, 007

James Bond, 007

Boris Jonson, the British Prime Minister, opened the conference in Glasgow. He compared the climate mission to James Bond. This is how he introduced Glasgow: 'Welcome to Glasgow and Scotland, whose globally most famous fictitious person may be a man named James Bond. Hans lucrative films often peak when he has a doomsday bomb attached to his body and frantically tries to find out which cord to cut. That moment is where we are today. But the tragedy in our world is that we are not in a film. The bomb of doom is genuine. The problem is that Boris Johnson cut the wrong cord, since carbon dioxide does not cause global warming and climate catastrophes. The conclusion of conference can be described as catastrophic and disappointing. A weak result for, among others, Al Gore and his hunt for CO₂ emissions in the early days of the 21st century (*An Inconvenient Truth*). After the conference he was called 'a bomb of doom'.

Briefly on Climate Science

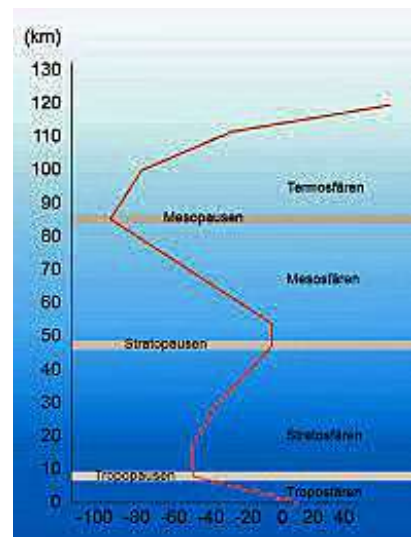

The Atmosphere: The atmosphere consists of layers of gases e.g. nitrogen and oxygen. Normally referred to as **air**. It makes all life on Earth possible, not only for us humans, but also for animals and plants.

Using height and characteristics we divide the atmosphere into different layers. The first layer is the troposphere, which begins on the surface of the Earth and extends to an average height of 12 kilometres. This is the densest part of the atmosphere and most of Earth's weather takes place here.

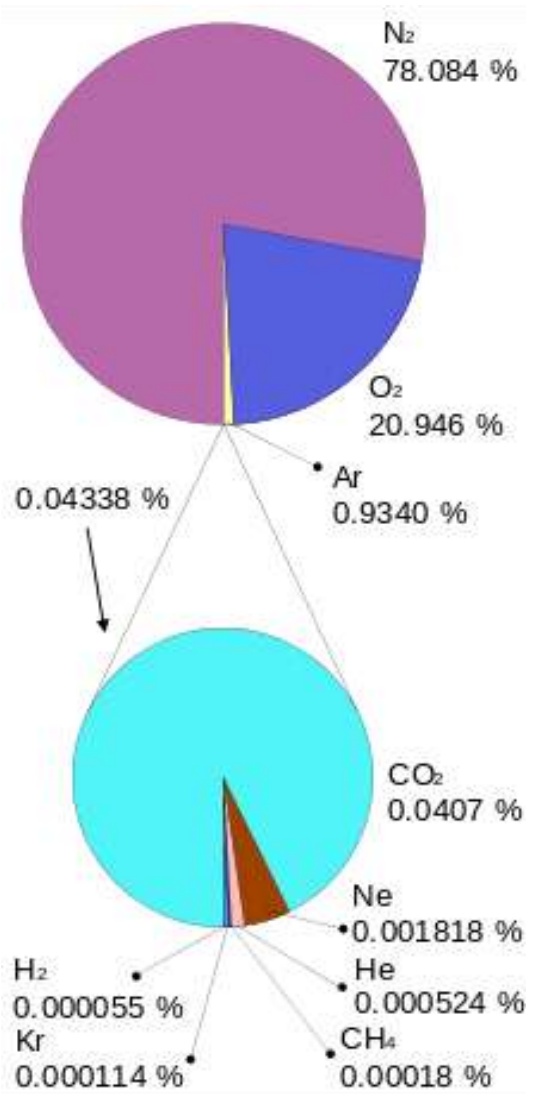

The Swedish National Space Agency provides us with a good definition of the atmosphere. It contains various gases, among others **nitrogen N₂, 78%, oxygen O₂, 20,95% and carbon dioxide CO₂, 0,038%**, what we normally mean when we talk about **air**. The atmosphere is partitioned into layers. The very first one is called the **troposphere** which begins on the surface of the Earth and extends upwards to around 8 - 12 kilometres. This is the densest part of the atmosphere and most of Earth's weather takes place in this region. We will remain in this region to have a closer look at carbon dioxide and emissions. CO₂ is heavier than air which means that **it collects near the ground and in caves, forests and seas**. In other words: CO₂ is heavier than nitrogen and oxygen and is stored on the surface of the Earth, in the troposphere. This means that CO₂ does not reach top layers of the troposphere. If we compare CO₂ to nitrogen and oxygen, we notice that CO₂ constitutes a very small part of the troposphere, not even 0.5%. But it is very important for life on Earth, also for plants. This is the foundation of climate science regarding CO₂ emissions which are said to be the cause of global warming and climate change.

**The atmosphere:
Composition:**
78,08 % nitrogen (N₂)
20,95 % oxygen (O₂)
 0,93 % argon
0,038 % carbon dioxide, CO₂

Air composition			
Gas	Formula	Mole fraction ppm	%
Major constituents of dry air, standard pressure and temperature			
Nitrogen	N ₂	78,084 %	75,518 %
Oxygen	O ₂	20,942 %	23,135 %
Argon	Ar	0,934 %	1,288 %
Natural gas content			
Carbon dioxide	CO ₂	0,040 %	0,058 %
Neon	Ne	18,180 ppm	12,67 ppm
Helium	He	5,240 ppm	0,72 ppm
Methane	CH ₄	1,760 ppm	0,97 ppm
Krypton	Kr	1,140 ppm	3,30 ppm
Hydrogen gas	H ₂	~500 ppb	36 ppb
Nitrogen dioxide	NO ₂	317 ppb	480 ppb
Carbon monoxide	CO	50 – 200 ppb	50 – 200 ppb
Xenon	Xe	87 ppb	400 ppb
Difluorklormetan (CFC-12)	CCl ₂ F ₂	535 ppt	2 200 ppt
Fluortriklormetan (CFC-11)	CCl ₃ F	226 ppt	1 100 ppt
Difluorklormetan (HCFC-22)	CHClF ₂	160 ppt	480 ppt
Koltetraklorid	CCl ₄	96 ppt	510 ppt
Trifluortrikloretan (CFC-113)	C ₂ Cl ₃ F ₃	80 ppt	520 ppt
1,1,1-Trikloretan	CH ₃ -CCl ₃	25 ppt	115 ppt
1-Fluor-1,1 - dikloretan (HCFC-141b)	CCl ₂ F-CH ₃	17 ppt	70 ppt
1,1-Difluor-1-kloretan (HCFC-142b)	CClF ₂ -CH ₃	14 ppt	50 ppt
Svavelhexafluorid	SF ₆	5 ppt	25 ppt
Bromdifluorklormetan	CBrClF ₂	4 ppt	25 ppt
Bromtrifluormetan	CBrF ₃	2,5 ppt	13 ppt

This table shows shares of natural gases, i.e minor gases which never cause global warming and climate change.

PPM, PARTS PER MILLION.

PPM stands for *parts per million*. It is used to measure the content of carbon dioxide in the atmosphere. Today it is 400 ppm.

Ppm is used to measure objects so small they cannot be evaluated in a sensible way such as litres or metres, they must be related to their surroundings. In this case CO₂ in relation to all other molecules. When you say 400 ppm it means that out of one million molecules in the atmosphere, 400 are CO₂. That is not much.

PPB, PARTS PER BILLION

PPB stands for *parts per billion*, in a climate context. It is used to measure the amount of laughing gas/nitrous oxide in the atmosphere. Today’s estimate is 317 ppb.

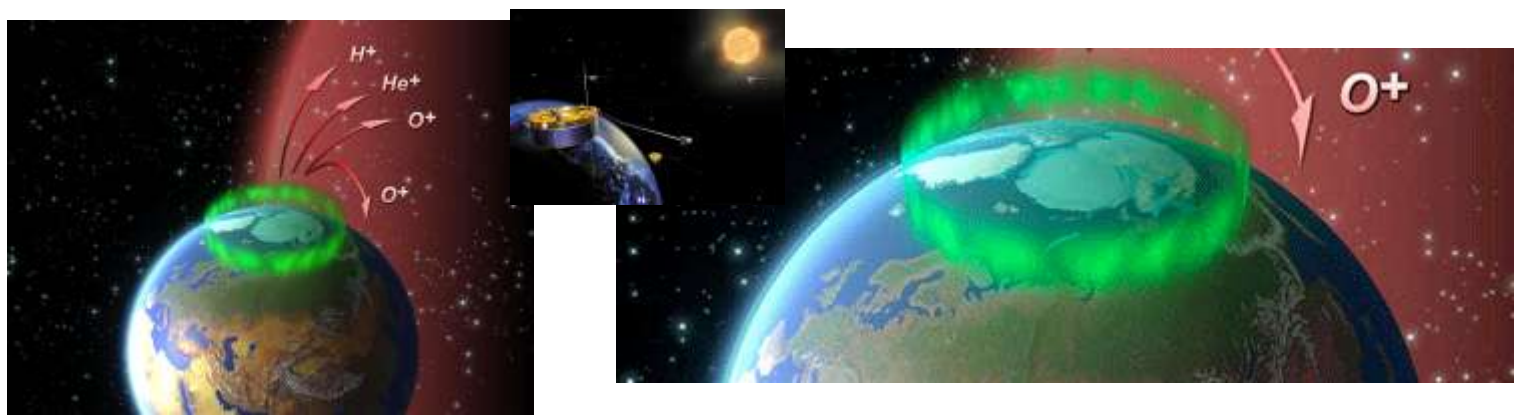

Ppb is used to measure objects so small they cannot be evaluated in a sensible way such as litres or metres, they must be related to their surroundings. In this case nitrous oxide molecules in relation to all other molecules When you say 317 ppb it means that out of a billion molecules, 317 are nitrous oxide molecules. A very small part of the atmosphere.

Gas	ppm in atmosphere	% in atmosphere
Nitrogen	780 840	78,08
Oxygen	209 460	20,95
Argon	9 340	0,93
CO ₂	400	0,04
Neon	18,18	0,002
Helium	5,24	0,000 5
Methane	1,745	0,000 2
Krypton	1,14	0,000 1
Hydrogen	0,55	0,000 06

This table shows **ppm** in the atmosphere. CO2 is a tiny part of it.

The tables above clearly demonstrate that so-called greenhouse gases/natural gases, among them CO₂ and methane, do not cause global warming and climate change. Boris Johnson evidently cut the wrong cord.

There is a worse scenario behind climate change than scientists' CO₂.

ESA – The Earth's atmosphere loses thousands of tons each year – our atmosphere is leaking.

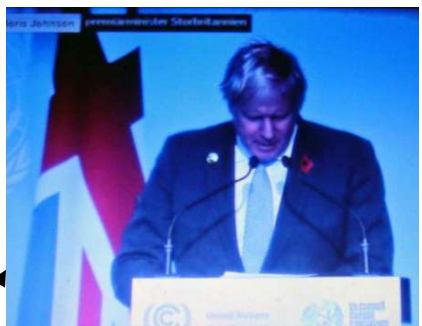

Every year a hundred million kilos of particles leave the atmosphere of the Earth for space. 7/12/2008
ESA /Space in Member States /Sweden
A Swedish-American team of researchers have made new measurements which show that each year several thousands of tons of the Earth's atmosphere leak into space from the Polar regions. The measurements have been carried out by ESA's cluster satellites and are published in *Nature Geo Science*. More info at **Industry, The Ark and the Global Flood**, pp 8 – 13, and *NASA: Nemesis, the Second Sun*, pp 10 - 17. Let's return to the UN Climate Conference in Glasgow.

Joe Biden, President of the USA.
Speech at the opening:
'This is the greatest challenge of our time, an existential threat against our lives.
Each day of rest rises the consequences of our inactivity. Let it be here, in Glasgow, that we take full responsibility. God bless you all and may God save our planet.'

Frans Timmermans,
EU Commissioner for climate action - Holland

Boris Johnson, Prime Minister, Great Britain.
Boris Johnson is a mystery. During President Trump's administration he supported Trump's climate policy. Not much talk about CO₂ emissions then.

After Trump came the new President Biden, a democrat who changed the American approach to climate change and revived the Paris Agreement from 2014.

Before Glasgow the pressure on him was probably terrific, from, among others, President Biden, the UN Secretary General and engaged Swedes. They wanted him to change his mind and lead the climate conference to a break-through, in Glasgow.

The entire UN Climate Conference collapsed into a catastrophe, a fiasco, and Boris Johnson was called 'bomb of doom'. This sounds as a nightmare for him. We should now correct Boris Johnson's mistake which he probably made involuntarily. At the opening of the conference, he mentioned a symbolic 007 James Bond. James Bond became famous because he never made any mistakes. How would Bond approach the CO₂ phenomenon today?

The entire UN Climate Conference collapsed into a catastrophe, a fiasco, and Boris Johnson was called 'bomb of doom'. This sounds as a nightmare for him. We should now correct Boris Johnson's mistake which he probably made involuntarily. At the opening of the conference, he mentioned a symbolic 007 James Bond. James Bond became famous because he never made any mistakes. How would Bond approach the CO₂ phenomenon today?

**António Guterres,
The UN Secretary General**

His speech at the opening:
'It's time to stop this. We must stop killing ourselves with CO₂ and using Nature as a toilet.'

**Frans Timmermans,
EU Commissioner for climate action
The Netherlands**

During the Climate Conference **SVT**, Swedish public television, interviewed Frans Timmermans about the management of CO₂ emissions. The interview was ended by Greta Thunberg, who was also in Glasgow. After the conference she and others sent this message to the world leaders, and also to you who are reading this: **'Shove your climate crisis up your arse!'**

This is, of course, a rather harsh message. How do you answer that?

Timmermans: 'Greta has achieved a lot during the last years with her harsh message. Today world leaders are using the same words as Greta used four years ago. They would never have believed it then, so she has achieved much.' And she can sing! Wow, SVT! So, her messages are good? Timmermans: 'Absolutely. She and her generation will push us forward.'

Frans Timmermans acknowledges and praises her message and the world leaders led by him have shoved the climate crisis up their arses. There was also room for the 2021 UN Climate Conference. It is a catastrophe that Timmermans's climate knowledge is at the same level as that of a sick little girl who, during the last four years, has supported the world's greatest bluff and criticized global businesses.

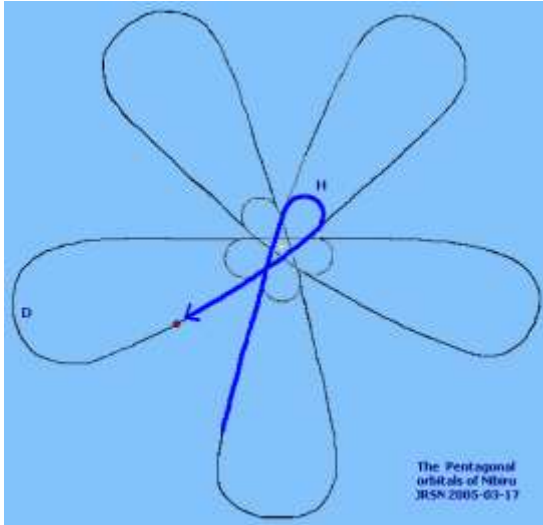

If we are familiar with James Bond's characteristic personality and lifestyle we know that he would have begun his mission by getting in touch with NASA via his own intelligence services. After NASA he would have approached the neutron star Nemesis. NASA regards it as a devastating power: 'Our own Sun gives life to almost everything on Earth. The other star only causes death only. A neutron star is a dead star, like a timebomb in our Universe. Bond would have cut the correct cord and learnt that the magnetic field of Nemesis is stronger than that of the Sun and the Earth, thus causing global warming and climate change. Since Johnson mentioned James Bond at the opening ceremony, Bond can remove the bomb of doom from the Prime Minister since NASA uses the same words about Nemesis. The actual CO₂ phenomenon, like global warming, only exists in films and books, but the bomb of doom is genuine. This is how agent 007 James Bond would have terminally triggered the CO₂ emission bluff. From now on, Boris Johnson is not a bomb of doom.

Nations with direct communication with space, such as the US/NASA, Russia, China, India, the Arabs via The United Arab Emirates, Brazil, ESA (Europe), certainly know that neutron star Nemesis is behind climate warming and changes. Read more at **Industry, NASA: Nemesis and the Second Sun**, pp 1-3 . In Sweden we continue with our green revolution, the CO₂ bluff, and weaken the country's economy. Sweden's new climate minister does not possess relevant knowledge, she does not know what CO₂ really is (but it is dangerous, and we should get rid of it). You do not need knowledge for that. Greta Thunberg might help her.

There are serious climate scientists around the world, they are not always visible and we do not always hear them. More info at **Industry, NOAA, Dark Star and Global Warming**, pp 2 - 38. **Daniel Schrag**, biologist, climate scientist, the US: **How could a human being change something as enormously large as the Earth?'** – **Daniel Schrag, I completely agree with you.** See also pp 50 - 54.

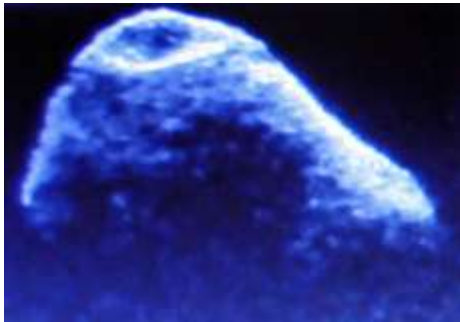

The Anunnaki Creation Story: The Biggest Secret in Human History - Nibiru is Coming

DOD. USA

People involved, astronomers and organisations, among them NASA, have estimated that neutron star Nemesis will leave the solar system around **2045 - 50**. Then, automatically, global warming will stop, and everything will return to normal (Nemesis will enter a shorter orbit, around 800 – 1,000 years). This date is referred by, among others, the UN Climate Panel and other dark and unreliable climate scientists. The world has many times been told that whatever we do on this planet, it will be insufficient. Of course not, when CO₂ emissions are not the cause of global warming. It is too late to stop today's threat against protection. We can, on the other hand, diminish the threat by liberal policies and knowledge. Better late than never. We also have the pandemic.

More info at **Industry, It is Time to Build the Ark again. – We had our chance, now it is almost too late.**

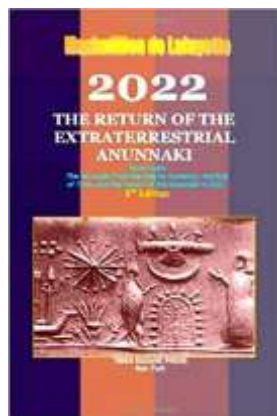

Asteroid Apophis, asteroid of doom.
Another anonymous asteroid will hit the Earth,
according to Revelation.

NASA: The black hole was discovered by NASA in
2016, on its way towards us.

More info at **Industry, Conquering Space 18, Lucifer**, pp 181-183

NASA: Arawn, UFO, off planet Pluto, was discovered in 2016.
Here lives the Father of Gods, Anu.

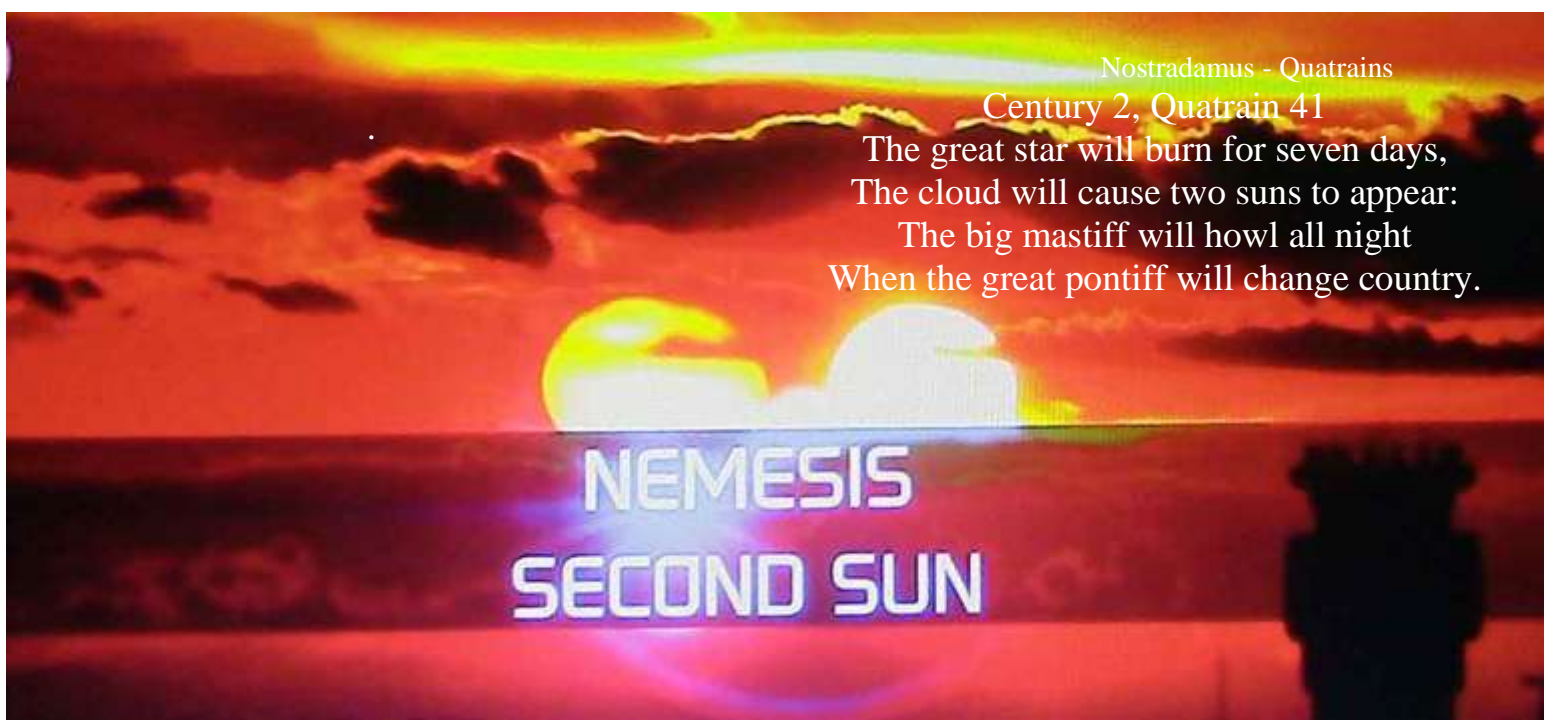

More info at **Industry, Conquering Space 18, Lucifer**, pp 184-186

NASA: Nemesis, the Second Sun, was discovered in
2016.

More info at **Industry, Nemesis: Nemesis Second Sun**,
pp 1-3

In the Bible we can read about Sons of Light and Sons of Darkness. Behind the CO₂ emission phenomenon, we find Sons of Darkness. The world knows about those who darken the Earth, who allow people to live in darkness and be sick and blind. Sons of Darkness enjoy lead good lives during the new world order, the pandemic. NASA, on the other hand, is the world's bright spot. There we find people who renew the history and science of the Earth using top levels of knowledge. They are called Sons of Light. All references and leads on my website point to these individuals, the wise ones. Unfortunately, the Kingdom of Sweden is involved in the blackout of reality, as is Hungary, headed by Orbán.

Nostradamus - Quatrains

Century 2, Quatrain 41

The great star will burn for seven days,
The cloud will cause two suns to appear:
The big mastiff will howl all night
When the great pontiff will change country.

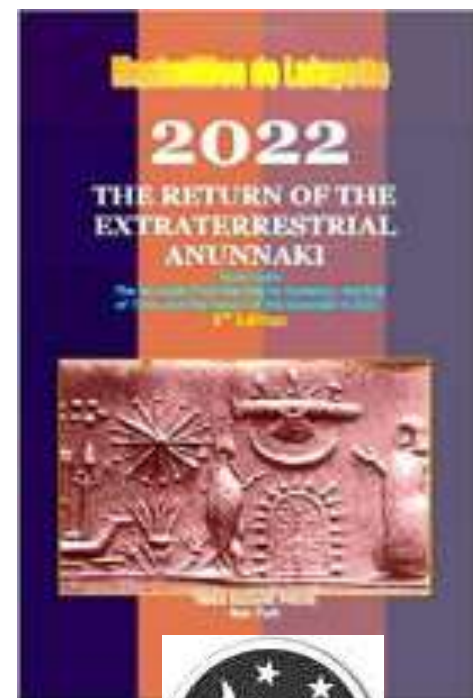

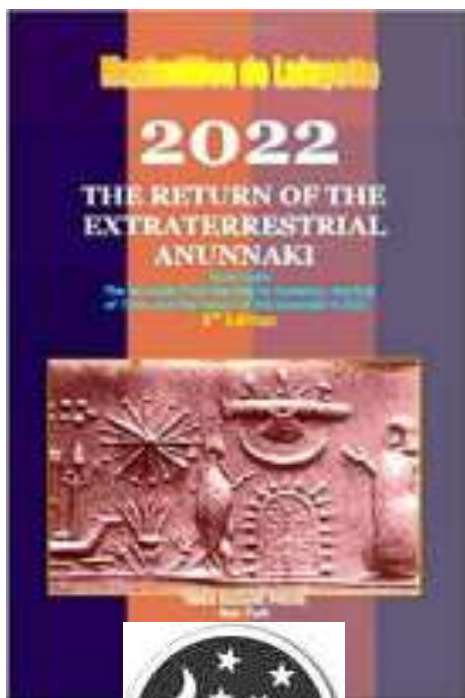

NEMESIS SECOND SUN

The Anunnaki Creation Story: The Biggest Secret in
Human History - Nibiru is Coming

DOD. USA

As a conclusion, I can again repeat what I have said a couple of times before: My Website is for sensible people who want to learn about the world we occupy and the meaning of life. For them, the Website is positive and instructive.

Even the Gospels suggest that the world does not pay attention to the approaching End, life goes on as usual without preparations and finally it is too late, the final days are short. The global CO₂ phenomenon hits ignorants who feel guilty, various illnesses will attack them: depression, anxiety, etc. Is it sensible to lie to the world? Do we really want to create chaos, illnesses and madness across the globe just to make people suffer?

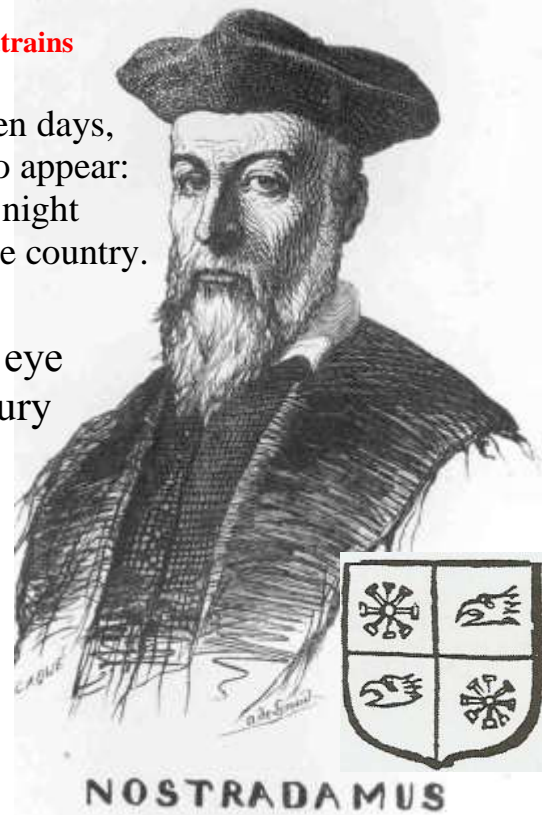

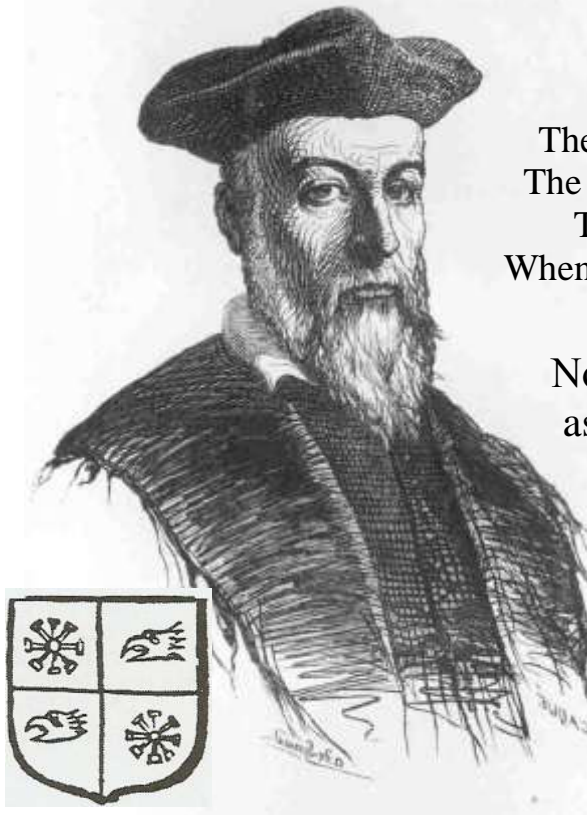

The binary star system which causes a variety of global catastrophes.

Nostradamus - Quatrains

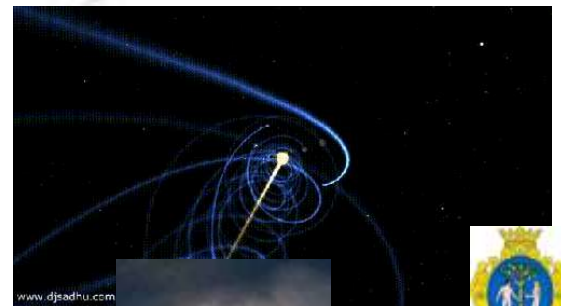

Century 2, Quatrain 41

The great star will burn for seven days,
The cloud will cause **two suns** to appear:
The big mastiff will howl all night
When the great pontiff will change country.

Nostradamus hit the bull's eye
as early as in the 17th century
