

The Battle of the Kingdom of Death

The Battle of the Kingdom of Death

by Josef Kemény, 12/21/2014

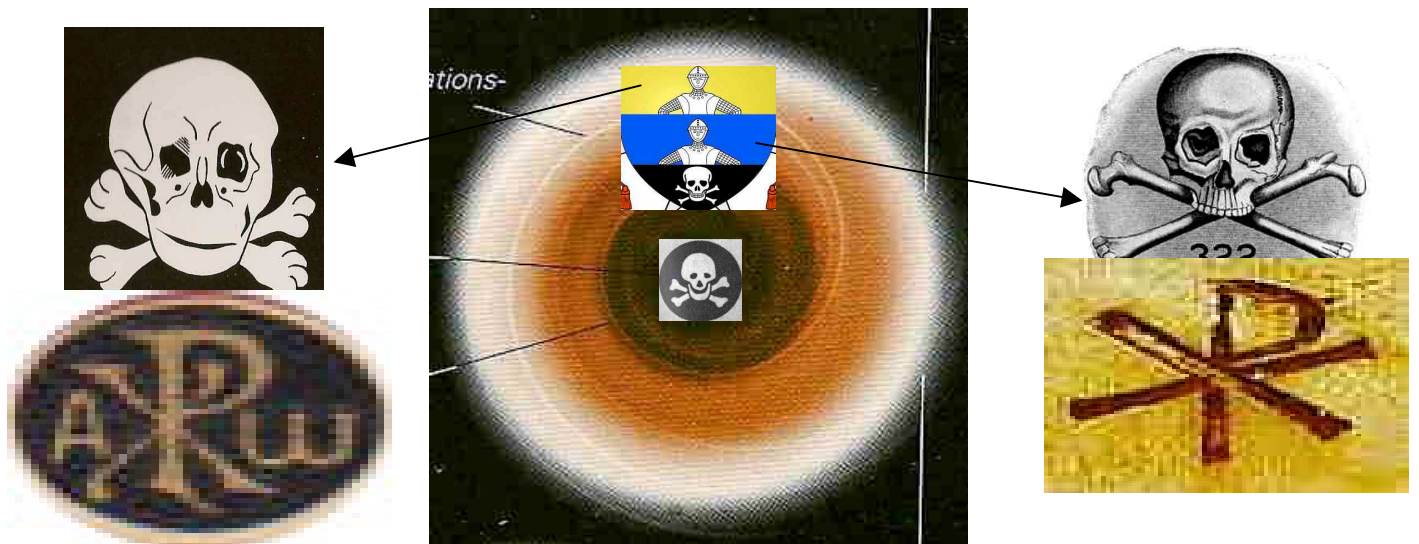

Thomas' Gnosticism - Advanced

Life or Death. There is no third option. We can compare our galaxy to a seed. From a seed comes Life but after some time Life disappears and Death appears. Note that I in this document use available material and interpretations are my own, according to my knowledge.

I primarily refer my readers to the following links on my webpage: *The Secret of the Black Hole, What Happens in a Black Hole?, Voyage Through the Black Hole, and Life and the Black Hole.*

Everybody knows that Life exists. Also in our galaxy, in proportion to different levels of frequency, Life seems to be eternal, but that is not the case. We have all heard about the Kingdom of Death, it turns up in, among other cultures, the ancient Egyptian religion in the form of the Deity of Death, or the Bull Deity Osiris. The stars of our galaxy can also be called a gigantic atomic system. At the centre of each galaxy, as in ours, there is a **living black hole** leading to a so-called eternal life, even it is only a prolongation of life itself.

The black holes originating from dying stars are also a kind of life prolongation, **dying black holes**. These black holes are called kingdoms of Death. They are also creations of the nature, but inside the world is different, unknown to us. If we end up there, we will never come back. More info at *Life and the Black Hole.*

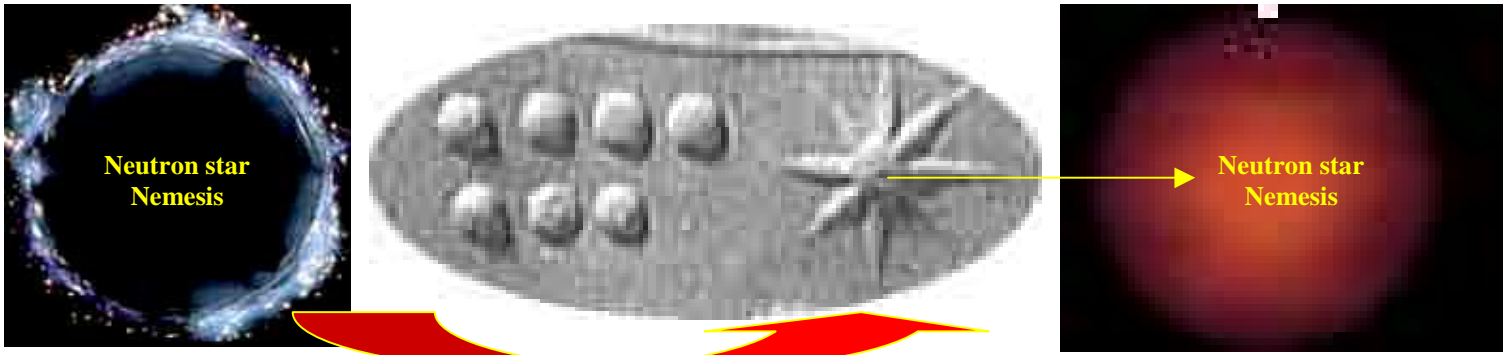

This star is a neutron star, a future black hole, a kingdom of death.

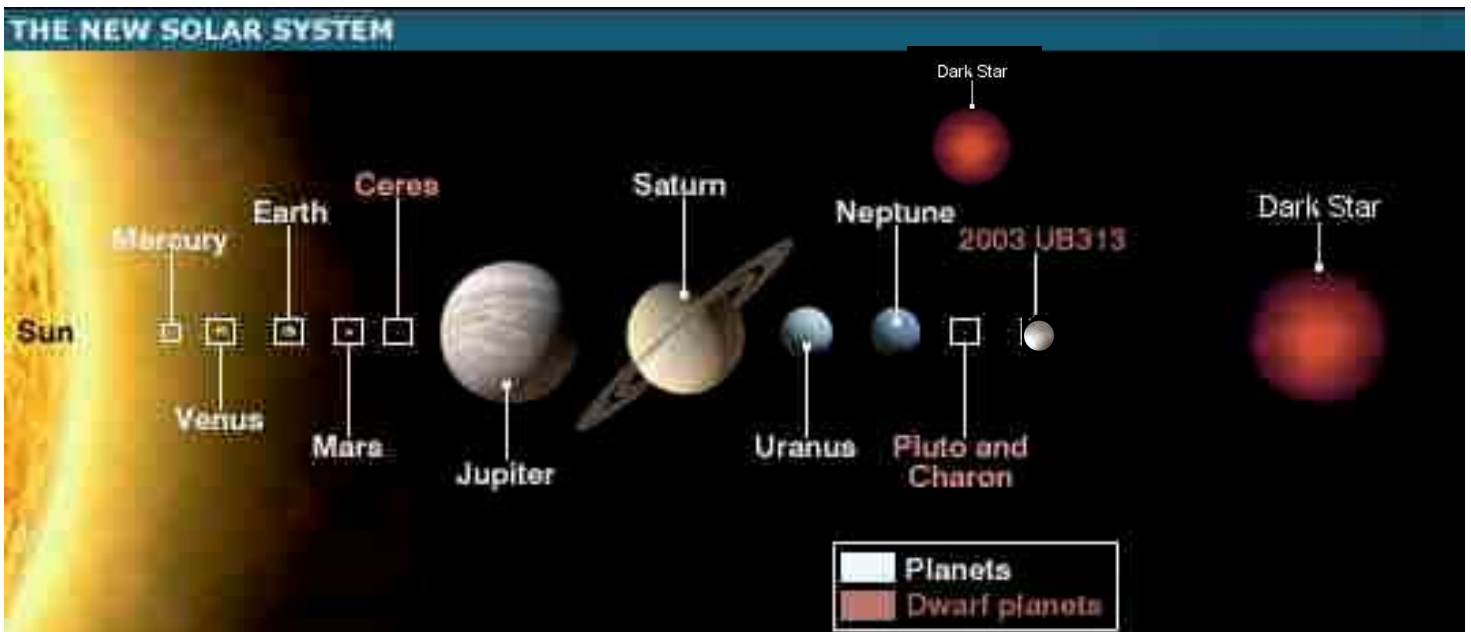

Finally, all neutron stars are transformed into a black hole and there are black holes everywhere in our galaxy, the Milky Way. There are many binary star systems in our galaxy, where one of the stars is a neutron star. This is also the case in our solar system, which actually is a binary star system. My starting point is that there is a more advanced level of knowledge in the other binary star systems, where they know that a black hole in a neutron star can prolong life. They do not want to admit troublemakers from other solar systems. If you have access to a neutron star like that, or to a black hole, you will want to keep it to yourself.

We also have a neutron star, known to us for the past thousands of years, it existed in ancient times. At first it was called "AN", then "Aten" and thereafter "Nemesis", one and the same neutron star, also called black sun or dark/black star, but in different eras.

There is life also in our solar system, but life exists at a different level of frequency. There is human life on, for example Venus, Mars, on certain moons orbiting Jupiter, Saturn, Uranus, and Neptune.

When you have a neutron star in your solar system, you will not need to travel to other binary star systems. There are intellectual beings who are thinking thousands, maybe millions of years ahead and at this point time plans are being made concerning the black hole, also called the kingdom of death. You can say that at this very moment the battle of the kingdom of death is happening and there are some candidates who want to master the world of death in the future kingdom of death. One candidate is the ancient Deity of Death, Osiris, the Bull God Osiris, also known as Gilgamesh the Bull from Sumer. The other candidate is the Lamb/Serpent, who, according to Revelation, has the keys to the Kingdom of Death. **Rev. 1:18.** Keys are symbols of, among other things, knowledge and knowledge is science. More info at *Omnipotent Akhenaten*, page 21 and *The Fourth Pyramid which Disappeared*, page 73. The Lamb Jesus/Izates II has, together with his disciples, joined Gnosticism, founded by Thomas, son of jack-of-all-trades, carpenter Joseph. Thomas' gospel was about the structure of the Universe. The Lamb Jesus also had this gospel and a copy was given to Paul the Apostle via Jacob, eldest brother of Izates/Jesus.

The new solar system, a binary star system. A yellow Sun, a red neutron star. The neutron star Nemesis is clearly visible outside the solar system. Far behind Pluto we see Eris/Xena-2003 UB 303 which orbits the Sun (orbital period 560 years). Behind Eris/Xena we see Nemesis/G1.9 with an orbital period of around 3,600 years. The reason why some people call Nemesis Planet X is because a neutron star shrinks with time, down to the size of a planet. Planet Nibiru which orbits Nemesis is also called Planet X. This picture is a few years old, Nemesis is today closer to us and may now be abreast of Pluto, maybe it has already passed it. The latest information I have is that Nemesis today is between Neptune and Pluto. It seems to be the case that Nemesis is fast and approaches us faster and faster.

More info at *Life and the Black Hole*, pp 6-7.

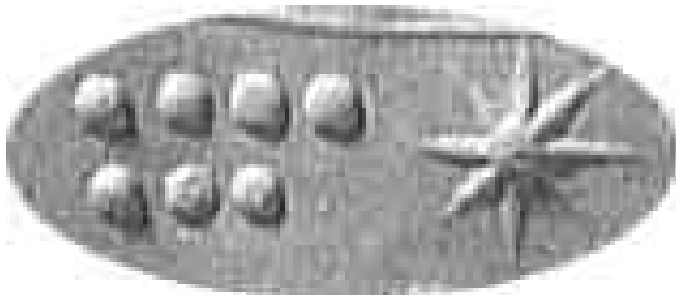

Largest known trans-Neptunian objects (TNOs)

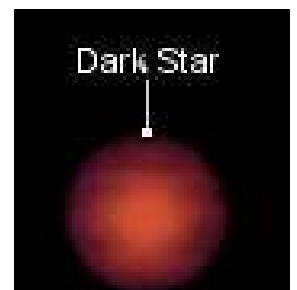

There are a few so-called "dwarf planets" which disappear outside the solar system together with their respective moons. These small dwarf planets have an orbital period round the Sun of several hundred years. They disappear but return as comets and belong to the solar system.

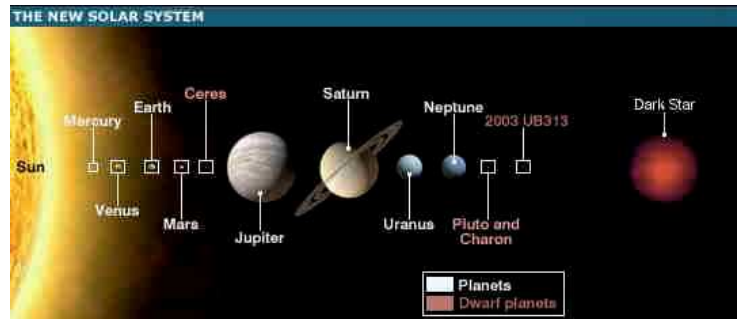

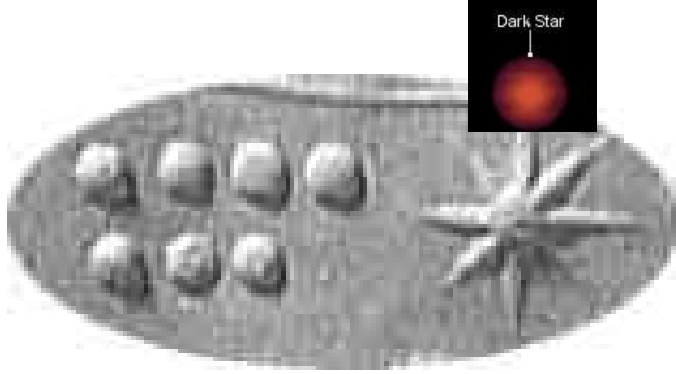

We can note that there are some interesting and mysterious dwarf planets of Pluto's size. One of them is Eris/Xena with an orbital period of 560 years. Another dwarf planet is the small red Sedna with an orbital period around the Sun of **11,500 years**. Planet 2005 FY9 has an orbital period of 307 years, planet 2003 EL61 285 years. Neutron star Nemesis and its planets appear among these dwarf planets. An ancient and modern solar system turns up from the depth of space after being away for **3,600 years** or more.

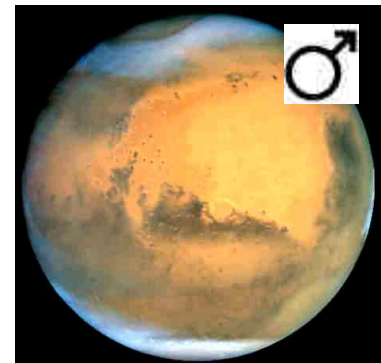

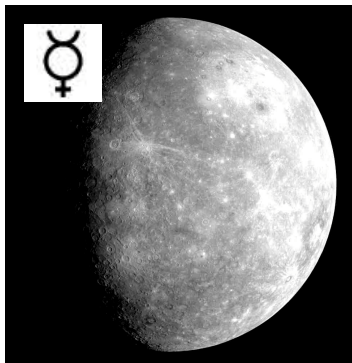

The question is whether these dwarf planets long ago did not belong to Nemesis' solar system, they are about the size of the Moon.

When two suns meet or orbit each other, natural catastrophes occur on all planets in both solar systems. In this case the natural catastrophes become more extensive in our solar system, since Nemesis' magnetic field is much more powerful than that of the Sun. Here on Earth the natural catastrophes have already been active for some years, e.g. earthquakes, floods, hurricanes, droughts, bushfires and various unknown diseases start to appear. Even volcanoes are coming to life and global warming increases gradually. Today's science claims that global warming is a result of emissions of carbon dioxides. If we compare the CO₂ emissions in our atmosphere and compare them to, for example, those of Mercury and Venus, we find strange things.

The Mercury atmosphere has a CO₂ level of **3.6%**. Has no moon, does not rotate on its axis, is closest to the Sun.

The Venus atmosphere has a CO₂ level of **96.5 %**. Has no moon, does not rotate on its axis. Second planet from the Sun.

The Earth's atmosphere has a CO₂ level of **0.038 %** Has a moon, rotates.

The Mars atmosphere has a CO₂ level of **95.7 %**. Has two moons, rotates.

The Mercury atmosphere has a CO₂ level of 3.6 % Venus 96.5 %, Mars 95.7 % and The Earth 0.038 %, thus far from 0.5 per cent. If certain scientists claim that this level of 0.038 % CO₂ causes global warming here on Earth, then the surfaces of Mercury, Venus, and Mars would be on fire. Who causes fires and emits CO₂ on Mercury and Venus despite a powerful greenhouse effect? The scientists do not talk about the balance between global warming and global darkening, not about the flora. Neither do they talk about the atmosphere on Mars, dominated by CO₂, but with no greenhouse effect. We cannot do anything about the global greenhouse effect, it is caused by the neutron star Nemesis, not by CO₂ emissions. All these lying scientists are of the same values as the priests, they are all tarred by the same brush. But it is correct that catastrophes and the end are approaching.

We can establish that the return of the neutron star causes global warming and the greenhouse effect. It is already in our solar system. The closer it comes, the worse the natural catastrophes of different forms will be, not only here on Earth but on all planets and their moons. I write about this in my latest book, *Global Climate Change and the End of Time*. More info at *The Maya Calendar and Omega*, pp 6-12.

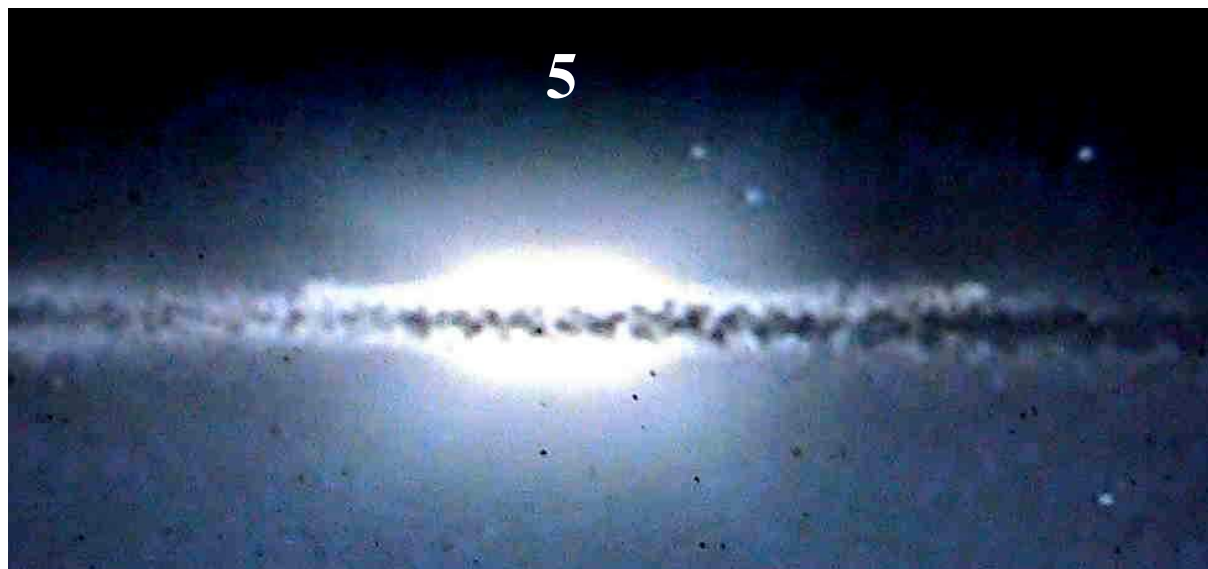

To conclude I return to the Milky Way, to our galaxy, and a recent 3D-illustration by ESA/NASA, September 2013.

The Milky Way seen from above

The Milky Way seen from above

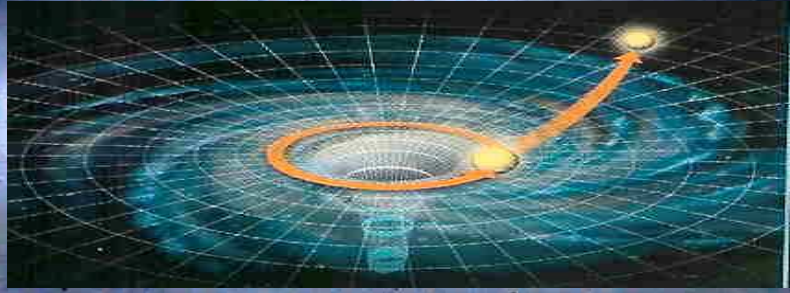

The Milky Way seen from the side, the nucleus is described as being similar to a peanut. A result of efforts made by, among others, Galilei, Newton, Einstein and NASA concerning our galaxy.

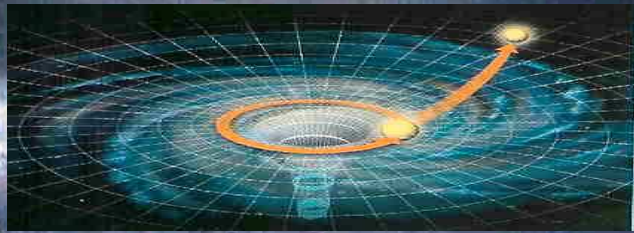

The Milky Way seen from above. You can see its centre where there is a black hole leading to its interior where a human world is being created. The black hole functions as a barrier, a gate which admits material and celestial bodies at the proper level of frequency or vibration related to the nucleus. In the Gospels, the Lamb/Jesus calls it "Life's Road."

The road into the interior of our galaxy, the Milky Way

The Milky Way, our galaxy seen from its side. We can compare the Milky Way with “Corona Latina”, i.e. Saint Stephen’s Holy Crown of Hungary, see above (Stephen was a reincarnation of, among others, the Lamb/Izates II, Jesus). On the crown we see the cosmic tree of life in the shape of our Milky Way. He sees himself as the cosmic tree of life and points to his crown, a symbol of Life’s Road. To point out and speak about Life’s Road is one thing, but it is quite another to reach the end of the Road. If we look at the Milky Way in the picture above, we see that it looks like a flying saucer. In other words: a flying saucer is a miniature of our galaxy. More info at *Obscure Magyar*, page 44.

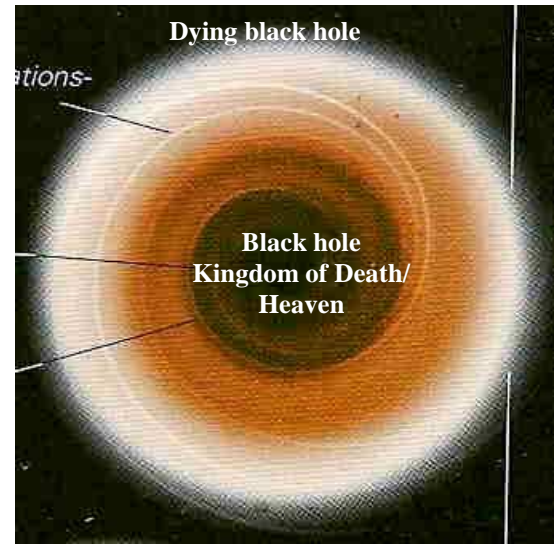

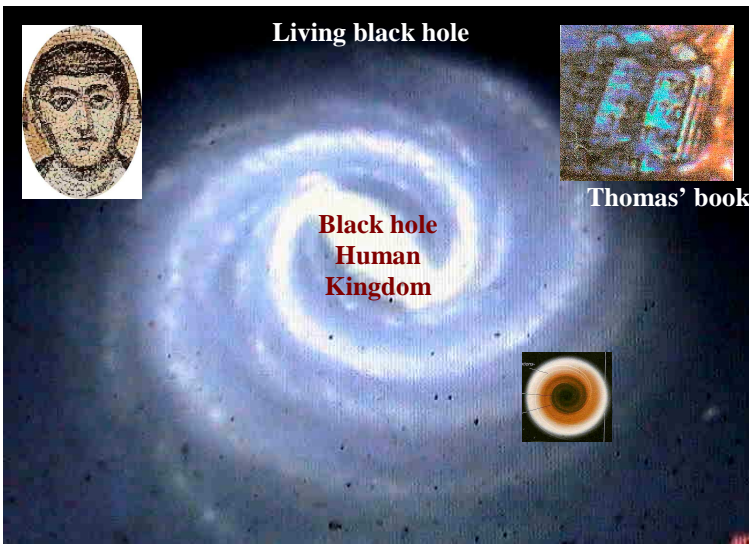

At the beginning of 2013 the Swedish Church introduced the tree of cosmic life as the Milky Way, a new version. The fact that the tree of life or the cosmic tree of life is a symbol of our galaxy, can only be read from my webpage. More info at *The Fourth Pyramid which Disappeared*, page 68. The Swedish Church has no knowledge at all about the symbolic meaning of the cosmic Tree of Life.

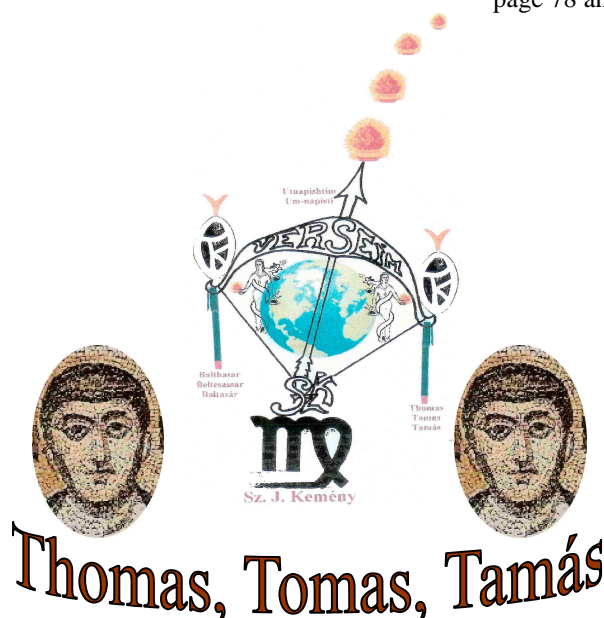

One thing is certain: our galaxy the Milky Way has nothing to do with religion and gods. It is there for Man, for human beings and humanity, as a gigantic natural world.

Gnosticism, knowledge and science connected to the laws of nature. If you want to get into the interior of the Milky Way, into the nucleus which NASA compares to a peanut, you need to be at a level of frequency which corresponds to the interior of the galaxy. The key is the different levels of frequency or vibration in the actual galaxy. You can also use the term wavelengths. You cannot fool nature, I think about my father's paternity issue. We human beings are also at different levels of frequency, depending on our blood group.

The battle about the Kingdom of Death has already started. What does the world, the nature, look like inside the black hole? Nobody knows, nobody has so far been there. The natural laws rule there as well, but he who wants to rule inside wants to reintroduce a religion headed by God and call it God's Kingdom instead of the Kingdom of Death. Here, too, blood group is a priority. More info at *Visitors to the Moon*, page 78 and *Life in the Black Hole*.

Man's World is Created by Laws of Nature

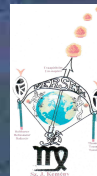

18

Rev. 6:2. "And I looked, and behold, a white horse. He who sat on it had a bow; and a crown was given to him, and he went out conquering and to conquer."
(A white horse is a symbol human beings of blood group 0)

N.B! My message, stated on web pages as well as in books, is for wise people around the world, people very interested in nature and life. My motto is: Knowledge is Life and Life is Knowledge. He or she who needs to understand my message will understand it. He or she who has no need, will not. It is as easy as that. Good Luck!
