

The Sun at a Disadvantage

Gigantic activities on the Sun, an extra charge.

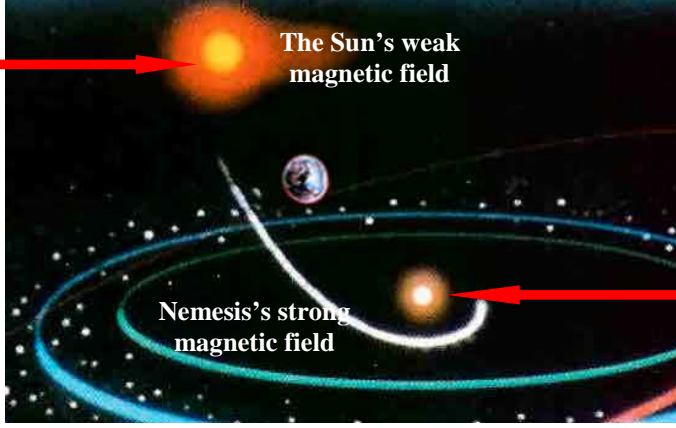

Eruptions on the Sun's surface ...

Enormous activities on the Sun's surface. According to astronomers, the Sun's magnetic field is weaker than before.

The Sun's magnetic field

The Sun's weak magnetic field

Nemesis's strong magnetic field

Nemesis's magnetic field

If the Sun's magnetic is weaker than before, it is because there is another object in the solar system which has a stronger magnetic field than the Sun. The object is a celestial body, a neutron star which was initially called AN, then **Aten**. Now we call it **Nemesis**. This celestial body is also a dark star and is now inside our solar system. It has a stronger magnetic field than the Sun and exerts an influence on it. This legendary neutron star which appears in ancient records and stories, even religious ones, will soon re-appear in the sky. It will come back after around 3,600 years and now everybody will learn to know the black sun and its repercussions. Nostradamus, too, writes about this planet which will rule in the solar system, it is on its way. Both in ours and in Nemesis's solar system there will be terrible natural catastrophes of various kinds. Above all in our solar system, where all celestial bodies will be involved. Right now our Sun is at a disadvantage in comparison with the dark sun Nemesis. More info at *Life and the Black Hole*, pp 6-10.

From the Sumer era we can see the neutron star Nemesis's solar system with 7 planets. This dark sun is symbolized by a 7-pointed star. But if we include the shadow, the sun becomes an 8-pointed star. What can this mean? Maya astronomers (800-1050, the Maya calendar) were very interested in the neutron star's pentagonal orbit around the Sun and they were particularly interested in Venus's orbit in connection with Nemesis's return. What can also happen is that when Nemesis enters the solar system, it will catch Venus in its orbit and leave the solar system with Venus as its 8th planet. It will then become an 8-pointed star which, symbolically, is the star of the Lamb. – Note that I interpret this theme according to my knowledge.

Planet Venus; the evening and morning star Venus

During the next 40 years we will see if Venus ends up in a different solar system or not. The Maya snake deity Kukulcan called himself Venus. More info at *Mayas-Inkas-Azteks and their Secrets*, pp 9-14.

We can move to our closest celestial body, the Moon. On Apollo 14's emblem we can see Nemesis as a comet which visits the Moon, revealing its secret to the population on Earth...

Apollo 19 (Endymion-Artemis) was a secret DOD mission which was launched at Vandenberg Air Force Base in California at some time in December, 1975. According to William Rutledge, its mission was touch down outside the crater Izsak-D on the far side of the Moon, at the foot of Mount Monaco. There was the cigar-shaped spacecraft which the crew were to visit and also walk around on Mount Monaco. They were assigned to visit two more triangular spacecrafts and explore the surroundings. A tough mission, like that for Apollo 20. The crew may have been armed. One of the Apollo 20 astronauts, William Rutledge, has revealed the secret mission for Apollo 19. According to him, Apollo 19 had an accident and all crew members were lost in a collision in space of which we know nothing. More info at *Visitors to the Moon, final*, page 54.

Apollo 20 (Flyover-Phoenix) was the last secret mission for Apollo, USAF and NASA. Touch-down on the far side of the Moon outside crater Izsak-D late in the evening of August 18, 1976. After that several hours with lunar roving vehicle #6, LRV-20. As far as I understand their mission and program, their assignment was to gather evidence in connection with Christianity, see their insignia. After a week's exciting and rewarding journey, they landed safe and sound on Earth.

Phoenix

On August 18 LM-Phoenix landed on the far side of the Moon, outside crater Izsak-D. After that several hours with LRV-20.

The Italian journalist and writer Luca Scantamburlo corresponded in 2007 with former astronaut William Rutledge, commander on Apollo 20. The correspondence reveals bits and pieces of Apollo 19's and Apollo 20's secret missions. It is very interesting that Rutledge does not mention Apollo 18 and its crew who were left on and around the Moon. He claims that Apollo 18 was another name for the Apollo-Soyuz Test Program. It becomes apparent that Apollo 18's mission was so secret that even he will not say anything about it. On the other hand, he often referred to Apollo 19 in parallel with Apollo 20. Apollo 19's commander was Stephanie Ellis, who was his girlfriend. She was born in 1946 in Abidjan (the Ivory Coast) and came to the US as a small child with her parents. Later in life she worked for Grumman Bethpage and became a lunar module (LM) specialist, field of expertise navigation systems. Both Apollo 19 and 20 had problems with docking and rendez-vous systems, according to Rutledge. Her technical knowledge was extensive and her knowledge and skills were compared to those of astronaut Roger Chaffee on Apollo 1. She became the commander of the Apollo 19 crew when the original commander resigned. Rutledge says that the LM was called **Artemis**, probably named by Stephanie Ellis. Who was Artemis? Let us have a closer look at her.

The coins are from the time of Alexander the Great and depict him. The reverse side of the coins depict Zeus. Alexander was a reincarnation of, among others, Zeus and Jupiter.

According to Greek mythology Athena was Zeus's and Hera's first child, neither man nor woman but a hybrid/virgin. In those days she played a female role. Apollo and Artemis were both born late in Zeus's life when Athena had probably died.

A statue of Apollo in the Vatican Museum, the Greek deity. The statue shows a muscular and weak individual and a hidden sexual organ. This means that Apollo was neither man nor woman, a hybrid. In those days his role was male. Next to the statue is a tree with two wriggling serpents, Apollo was a reincarnation of the Serpent Goddess Athena. He was a Greek deity of e.g. prophecy, healing, conjuring, music and poetry, and was also called the God of Light. In the *Iliad* Apollo is a frightening character who with his arrows shoots a lethal plague on the Greek. In several myths he and his sister Artemis appear as ruthless murderers thirsty for blood. But Apollo can also cure diseases and wounds. NASA named their lunar program after this deity.

Artemis is a goddess in Greek mythology and the goddess of chastity. She is also called a virgin and moon deity. Her animal origin is a deer. The picture shows a lying Artemis. Behind her is a crescent moon and a message that she belongs to the family of the Bull God Zeus. She was seen as a moon deity since she hunted under the Moon, in moonlight.

William Rutledge also related a very important incident: when the lunar module Luna-15 crash-landed on the far side of the Moon in July, 1969. The cigar-shaped spacecraft is still there. He also gives an exact position for the crash-landing: "Luna 15 in July 1969 crashed just at the South of the nose of the ship." – He and Leonov saw the wreckage of Luna-15 there.

Luna-15 20/07/69

We know that the Soviet Union managed two large lunar programs simultaneously. One was a manned Soyuz program, the other an unmanned Luna program. When a spaceflight was successful Moscow talked about the spacecraft Soyuz, when it was a failure they mentioned Luna or kept quiet. The Soviet lunar program was thus a combination of Soyuz and Luna. The Soviets were always vacillating before each launch and never announced the goal of the program in advance. When Soyuz was safely back on Earth, information came from Moscow.

What happened in July, 1969? – **Tiuratam Cosmodrome: 03/07/69, Soyuz 7K-L1-1** exploded at take-off. Its goal was to land on the Moon before Apollo 11. More info at *Moon Mystery*, pp 44-46. – After the unsuccessful take-off there was a new attempt ten days later. The Soviet Union did not let go of the plans to win the race to the Moon. **Baikonur Cosmodrome: 13/07/69, Soyuz 7K-LOK/Luna 15** was launched to come first to the Moon. On Sunday, **July 20, 1969, Eagle** landed in the Sea of Tranquillity, **Apollo 11**. Let us have a closer look at Luna 15's flight and the relations between the USA and the Soviet Union.

Luna 15

Luna 15

Lunar module Lunnig Korabl, LK

Both Luna and Soyuz were built for a return trip to the Moon.

The Soyuz 7K-LOK/Luna 15 crew were two anonymous cosmonauts.

Baikonur Cosmodrome: 13/07/69, at 3:14 a.m. Soyuz 7K-LOK/Luna 15 was launched with two anonymous cosmonauts on board. It was supposedly a direct journey to the Moon (without a separate lunar module). The spacecraft was huge, launched by a rocket called N-1.

This is an illustration of a direct journey to the Moon in order to achieve a soft landing. (1), take-off from **Baikonur Cosmodrome** and (15) soft touch-down on the Moon.

The lunar module was named "Cyrillic". Phoenix = bird of fire which appears in both history and religion.

The lunar module was named "Cyrillic". Phoenix = bird of fire which appears in both history and religion.

The month of July, 1969, was a mysterious month in the history of space. On **July 13**, Soyuz 7K-LOK/Luna 15 took off from **Baikonur Cosmodrome**. On **July 16**, Apollo 11 was launched from Kennedy Space Center. On July 17 Soyuz 7K-LOK/Luna 15 entered its orbit round the Moon. On **July 19** Apollo 11 reached the Moon and finally, on July 20, both Soyuz 7K-LOK/Luna 15 and **Apollo 11**, Eagle landed on the Moon.

Mare Crisium, Sea of Crisis, is located on the border between the front and far side of the Moon. On the front side we can see the landing site of Apollo 11's Eagle, the Sea of Tranquillity. On the far side we find the Delporte-Izsak D area, where the cigar-shaped spacecraft can be found. The British radio telescope Jodrell Bank could also follow Soyuz 7K-LOK/Luna 15's journey to the Moon and concluded that it crashed in **Mare Crisium** because it came near the Moon's surface and became silent. When you reach the far side of the Moon there is no communication between the spacecraft and the Earth and Luna 15 was on its way to land on the far side of the Moon. William Rutledge related that Luna 15 crash-landed on the far side of the Moon close to the cigar-shaped spacecraft outside crater Izsak-D. We also knew that the astronauts Armstrong and Aldrin could see the Luna-15 retrorockets ignite at 3.47 p.m. Four minutes later, at 3.51 p.m. (UTC) the vehicle crashed on the far side of the Moon. This means that the Eagle was about to land in the Sea of Tranquillity on the front side of the Moon. They were finishing their last orbit above the cigar-shaped spacecraft and at 4.18 p.m. at Eastern Standard Time it touched down.

Had Soyuz 7K-LOK/Luna 15 been able to land, the Soviet Union would have won the race before the US. Minimal time difference, but enormous prestige since it would have landed on the far side of the Moon. When the Eagle had landed the crew told Capcom (CC), that they saw Soyuz 7K-LOK/Luna 15 crash-land, killing the crew. The Soviet Union was probably informed by NASA that the US had won the race to the Moon. – The New York Times published this about Luna-15 which was a unmanned lunar module, on July 21, 1969.

Russians bring Luna 15 in lower

New York Times

MOSCOW — The Soviet Union announced Sunday night that the orbit of its unmanned spacecraft Luna 15 was again altered, bringing it to within 10 miles of the moon's surface.

Tass, the Soviet press agency, made the disclosure only minutes before the Apollo 11 moon module detached from its mother ship on its historic landing of men on the moon.

The new Luna 15 elliptical orbit created a mood of tension among observers, who wondered if the latest correction was a prelude to an attempted lunar landing by the Russians, perhaps even in the same vicinity where the Americans have just landed.

Soviet officials have given assurances to the Americans that Luna 15 would not interfere with the Apollo mission. But the new orbit led to renewed speculation that the Russians might try to land the Luna craft and return it to earth with moon rock in an effort to demonstrate that unmanned craft are the equal if not more valuable than manned ships.

As usual, Tass gave no information on the eventual goal of the Luna 15 craft. It said only that "the automatic sta-

tion Luna 15 continues scientific exploration in the near moon outer space."

Luna 15 was launched last Sunday and went into moon orbit on Thursday. Saturday Tass announced that its orbit had been altered to between 136 miles at the maximum and 59 miles minimum from the moon surface.

Sunday's correction brought the craft into an orbit ranging from 68.3 miles to 9.94 miles from the lunar surface.

In its new orbit, Luna 15 was circling the moon every hour and 54 minutes, Tass said. The previous orbit took two hours, three and a half minutes.

Many observers here believed that Luna 15 would continue the research started by previous unmanned craft in the Luna series that orbited the moon but did not return to earth.

But Communist sources have insisted for months that the Soviet Union was planning to land an unmanned craft on the moon and then return it to earth.

So far Soviet media have given minimum attention to Luna 15 and most Russians are much more aware of the Apollo 11 mission.

After William Rutledge's story that Apollo 19's lunar module was named Artemis and that Luna-15 (Phoenix) had crash-landed on the far side of the Moon, close to the cigar-shaped spacecraft we can understand Apollo 19's mission outside the Izsak-D crater.

These two strong clues indicate that Apollo 19 would have touched down outside Izsak-D, also according to Rutledge, in order to explore the area and possibly clean up after Luna-15's crash. Commander Stephanie Ellis was a very capable and determined woman, maybe a kind of a hunter since she chose to name the lunar module "Artemis". Sorokin Aleksei Vasiliyevich was a Soviet cosmonaut with a civilian background as a doctor. Among other assignments he was part of the crew of Voskhod 1 as a back-up in 1964. How come that a Soviet cosmonaut suddenly was part of an American top-secret DOD mission? We know that Luna-15/Phoenix crash-landed, but did the cosmonauts die? Since the retrorockets were ignited and worked, it was not a total crash and it is possible that the cosmonauts survived. But the lunar module was so badly damaged that a return voyage was not possible. We know that all communication is lost behind the Moon, there was no contact between the Earth and Luna/Phoenix. If they survived, what happened to them? We also know that the small aliens own that area and that they manage a research institute and laboratory there, among other things.

Apollo 19

According to reports Sorokin was a very capable doctor and he probably knew the Soyuz 7K-LOK/Luna 15-Phoenix crew personally. As far as I understand, Sorokin's assignment was to establish how the cosmonauts died. The question is why the Soviet Union sent the crew to the Moon and allowed them to land on the far side without authorization, when they knew that the small aliens lived there. The third astronaut was **Cruithne**, according to Rutledge. He was one of three brothers. He was the last astronaut to join the crew and became the pilot of the Apollo module **Endymion**, which would orbit the Moon while Artemis carried out its mission at crater Izsak-D. I understand that the Apollo 19 crew were eager to fight. Their spaceflight was cut short by a collision, according to Rutledge, and they were not authorized to land on the far side of the Moon (note that I have designed the Apollo 19 insignia according to their program since nobody has seen the original one besides those who were involved, it should be close to the real one). More info at *Visitors to the Moon, final*, page 54.

One thing is obvious: In those days many mystery stories were published about Luna-15, Luna-23 and Luna-24. Manned lunar spaceflight failures may be behind these mysteries.

Apollo 19

Apollo 20

If we study Apollo 20's insignia we can see that its program is directed towards the far side of the Moon and that it is approved of by the aliens. There is a flying object in the shape of an airplane which tells us that the astronauts are USAF. There is also a cigar-shaped spacecraft which communicates with the lunar module **Phoenix** (Vandenberg Phoenix) and with the Apollo module **Flyover** (Vandenberg Constellation). The aliens are allies. The insignia also tells us that the program will be carried out and succeed, an expressive message. (The Apollo 18, 19 and 20 crews were USAF employees, Sorokin and Leonov were not)

To implement his program, USAF chose William Rutledge as the Apollo 20 commander. He belonged to the rare group of pilots who were not religious, they did not believe in God. He was involved in several USAF projects and also worked for the Bell Labs. He mentioned that he, among other issues, handled foreign technologies for the USAF in the 1970s. Foreign technology can also be called UFO technology which still employs people within the USAF. One such issue is "Area-51, S-4" in Nevada. If my interpretation "foreign technology = UFO technology" is correct, then he also worked there, together with some aliens. More info at *Visitors to the Moon, final*, pp 28-32.

The Italian journalist L.S. received a mail from a former American pilot in 2007 in connection with Apollo 20. The pilot wrote: "It is beyond any doubt that the **US** has been to the Moon after 1962, but not by using propelling rockets. The Mercury, Gemini and Apollo projects aimed at covering up secret missions and programs. It is possible that before the Apollo program the launches took place at Diego Garcia, not from Vandenberg." The journalist L.S. wrote that he never received any more letters from this former American pilot. He must have known about the lunar flight as early as in 1962. He must also have been a very secretive and influential USAF employee who knew about all top secret programs in connection with secret lunar journeys. But who went to the Moon as early as in 1962? With a flying saucer, of course. I have two candidates to the first American lunar mission. Note that these are my own conclusions based on certain clues. One was the secretive 32-year-old former astronaut William Rutledge who was at that time employed at Area 51, S-4 in Nevada where also aliens worked. In that way he could organize a return trip to the Moon. The other one was the President himself, John F. Kennedy, who in 1961 started the American lunar flights culminating with the touch-down on the Moon in 1969. – The launch site was Diego Garcia. (Kennedy was not only the President of the USA, he was also a world leader, one of the most powerful leaders on this planet)

Diego Garcia

As a civilian passenger

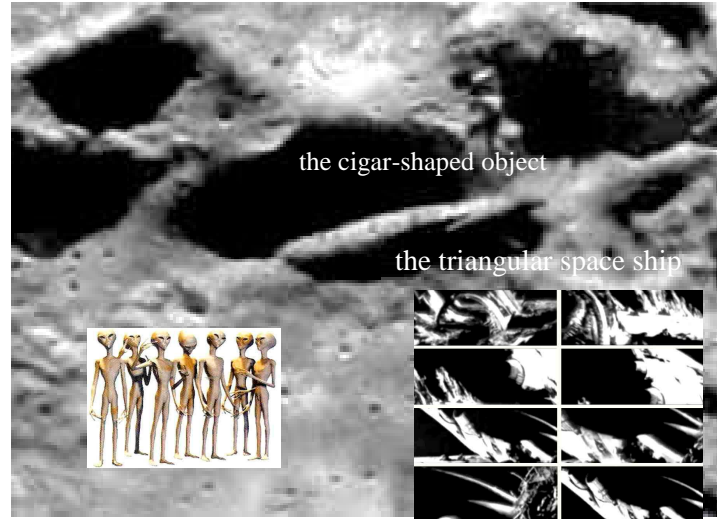

The journey to the Moon in 1962 did not use rockets, they were not yet developed, but flying saucers were. The flight itself was top secret, only few individuals around President Kennedy and USAF knew about it. Therefore Diego Garcia was the most suitable location for a launch facility. I have a feeling that that the spacecraft/saucer did not land on the Moon, but the crew and passengers could closely watch the important areas on both sides of the Moon. They obviously got a lot of first-hand information. Since Kennedy was a Catholic, the highlight may have been the lunar base on the far side of the Moon outside crater Izsak-D. The journey and everything else went according to plans. What happened then? – Kennedy lost his life in November, 1963. The first question from a reader could be if there is any evidence to confirm this. Yes, but not in the USA but from the Holy See during Pope John XXIII's pontificate (more info at *The Fourth Pyramid which Disappeared*, page 55), when the Black Madonna visited the pope on April 7, 1959. According to her diary she spoke about something that would happen four years later, connected to a world leader. President Kennedy was a world leader and the Madonna's prophecy concerned the aliens. This happened during Pope John XXIII's pontificate. When the pope heard about this, he was terrified.

One more former NASA astronaut appeared and contacted the journalist Luca Scantamburlo using the alias "MOONWALKER-1966DELTA". He was also a top-notch astronaut from the beginning, such as Gordon Cooper, Charles Conrad, James Irwin, Neil Armstrong, Edwin Aldrin, and others. He completely confirmed Apollo 20's lunar flight and he personally knew the Apollo 20 crew. These astronauts had extensive space knowledge, they wanted to inform mankind and cover up nothing. He also worked with foreign technology and took part in two spaceflights with Gemini 2 and Apollo. And two with the STS (Space Transport System).

The return trip to the Moon, start from Diego Garcia. They boarded a cigar-shaped spacecraft and the journey started. The command module orbited the Moon while the saucer/exploring descended towards the surface of the Moon.

Both of them, William Rutledge and MOONWALKER-1966DELTA have been asked questions about the cigar-shaped spacecraft, the city of knowledge and the two triangular spacecrafts. Extensive material about this is kept by the USAF and NASA. Rutledge has this to say about the spacecraft: "It is very old, damaged, and there are many valuable things inside. The triangular spacecraft contained many biological traces: vegetation in a "motor" section, a special triangular rock which emits "tears", a yellow fluid with medical properties. And, of course, traces of aliens. We found small bodies (10 centimetres) in good condition, alone in the ship in a network of glass containers. A more important discovery was two well-kept bodies.

One was a woman, EBE Mona-Lisa, 165 centimeters. Her hair was dark, she had six fingers, her body was well preserved and she was naked. Blood or an emission of biological fluids in a concentrated form around the mouth, nose, and eyes. Some parts of the body were particularly well preserved, hair and skin were protected by a thin transparent layer. She was neither alive nor dead, in other words: a dead person alive." This short description by Rutledge reminds me of a biological process in connection with the blood transformation process when it started but did obviously not succeed. Rutledge continues to say that she is on the Earth but she is not dead. In other words: EBE Mona-Lisa is here, alive. The other body was male, damaged. As far as I understand these two bodies were hybrids.

On YouTube you can watch EBE Mona-Lisa in lunar module LM-Phoenix.

We can see the equipment on EBE Mona-Lisa's face in connection with the blood transformation process. During some seconds, on YouTube, you can see the equipment in the form of a V-sign being removed by alien hands which are not human. It means that Rutledge and Leonov were guided by an alien. More info at *Visitors to the Moon, final*, page 69.

Interior of the triangular space ship/pyramid

We can clearly see that these fingers removing the equipment from EBE Mona-Lisa's are not human. The fingers are long and thin in all three pictures.

Short, thick and long, thin fingers of the aliens.

Hand and fingers looking similar

If we try to transfer the movements of the fingers below to the pictures above we can see that the fingers look alike. Note that the video recording is a close-up, while the pictures below are shot from a longer distance.

The hand and fingers of the aliens, varied sizes.

We can clearly see that the small aliens have four fingers. They vary in thickness and length.

Hybrids, neither men nor women

They call themselves humanoids and look like human beings

The aliens have four fingers but one of them (6) has six, like EBE Mona-Lisa. Izates II/Jesus had four fingers in those days in Palestine. More info at *Aries, Capricorn and the End of Times*, page 23 and *Visitors to the Moon, final*, pp 76-79.

The second question was about the "city", the city of knowledge. Rutledge briefly comments that he and Leonov had come upon various metals and gold, valuable metals. They also found a building and named it the Cathedral. Among the buildings in the city of knowledge is a modern research institute and laboratory for the blood transformation process. More info at *Visitors to the Moon, final*, pp 73-84.

In his correspondence with Luca Scantamburlo Rutledge wrote that he became religious in 1990 and that he is very interested in and has extensive knowledge of Sumerian culture. Also, that he was afraid in 2012 in connection with planet X/Nibiru and the return of the neutron star Nemesis. We can conclude that the whole Apollo 20 program was based on Sumerian culture which is also a reflection of events in Palestine. More info at *Visitors to the Moon, final*, pp 56 and 61-93 and *Life and the Black Hole*, pp 6-7. We can summarize and say that the whole lunar program coincides with religion.

The name "the Dragon" is familiar to everybody. It comes from Sumer. The Sumerian modern religion was called the "Dragon" and belonged to Beelzebub's clergy.

The Dragon also appears in Revelation as a beast and its number is 666.

The Americans are those who are most familiar with the American space program. Let us have a closer look at the American version of comparison about, among other issues, the lunar program Clementine.

If we study the insignia of lunar program Clementine, we will find some remarkable, secret issues. Let us have a close look at the American analysis connected to the Clementine insignia and lunar program.

1993

1. The design of an insignia should be constant, regardless of time. Americans have noticed that there are different versions of the Clementine insignia, versions that alienate it from the original one. The question is why. They also compare, in an excellent way, Clementine and Apollo.

An excellent comparison of Clementine and Apollo, Apollo can be called a goddess. In this case the goddess was a hybrid/virgin. Apollo was a reincarnation of, among others, Inanna and Athena. We can conclude that the Clementine program was a continuation of the Apollo program.

We can see five different versions of a program, five different landing sites on the Moon. On one of them is an M-like sign.

The M sign is visible on the far side of the Moon, outside the Izsak-D crater in the city of knowledge which I call research laboratories. More info at *Visitors to the Moon, final*, pp 73-84.

On this landing site we can clearly see a crater, **picture 1**, and in **picture 2** they have found the crater on the Moon. **Picture 3** depicts a remarkable phenomenon. There was a large object here during the 1970s and 80s. It disappeared later on.

See all these differences between the two logo!

Two look-alike women in one insignia.

The American analysis continues at a higher level. The pictures confirm that they are two different individuals resembling each other.

We can call this a change of identities, the original woman was replaced by someone else.

Eyes, eyebrows, nose, mouth, lips, cheekbone everything is different as we see a man on the left and a woman on the right!

Weird symbolism can be seen:

1. The crescent moon
2. Number #9 on asteroid Geographos
3. The Vector symbol
4. Fake shadow underneath the flag
5. The shield held behind the moon
6. Weird object left on the moonsurface
7. Weird object centre moonsurface

This is how the Americans analyse the original Clementine insignia.

The American flag looks fake.

Was the Clementine mission a "false flag operation"?

How many red stripes does the American flag have? "7"

How many do we see? "5"

How many white stripes does the American flag have? "6"

How many do we see? "5"

...and this is how they analyse the American flag, number four on the insignia above.

1

Asteroid 1629 Geographos, which Clementine I missed.

2

Neutron star Nemesis passes the Sun.

We can see two conspicuous differences. In **picture 1** we see the asteroid 1629, Geographos, numbered #9 behind Clementine. In **picture 2**, which is a later version, the asteroid is missing but #9 is still there. At the same time we see Clementine holding two shields. The asteroid 1620 Geographos is in orbit close to the Earth. Clementine missed it and was ordered back, according to records. The lunar module was named after the ballad *Oh My Darling, Clementine* (1884). – It is understandable that ordinary members of the public do not comprehend anything of this mythical lunar program Clementine.

The lunar mission Clementine is a continuation of the Apollo project and we know that Apollo comes from the ancient Greek religion. The lunar missions Clementine and Apollo connect in some way with religion. Let us continue our analysis regarding the latest version of the Clementine insignia.

The female name Clementine's male version is "Clement". Clement is also a papal name of 13 popes, Clement 1-13. (**Alexander** – Alexandra, **Paul** –Paulina, **John** –Johanna are some names used by men and women).

Clement IX, (1667–1669), Giulio Rospigliosi
240, 84 Star of the Swans

Clementine (1993-1999)
Lunar project, secret

Pope Clement IX lived at a time when Queen Christina came to Rome. We can see the pope's blue and yellow personal coat of arms, the colours of the Swedish flag. We can also see that the shield held by Clementine resembles the pope's personal coat of arms, a reference to the Roman Catholic Church.– We can also clearly see that Clementine's right hand has four fingers, as have the hands of the aliens. This concretely means that if you want to journey to the Moon, you will need permission from the aliens. In the Vatican the aliens are called angels and during these 2,000 years leaked information has suggested that the popes have had conversations with the angels.

$$3 + 3 + 3 = 9$$

Each #3 consists of three persons. If you add 3+3+3 you will get a 9. Note that this is how I see it.

From the Clementine lunar program and onwards (1993-1999) the Holy See took over the management. In secrecy, of course, and co-operation with the Holy See was enforced.

Back to the Roots

William Rutledge was Apollo 20's commander. One of his comments on YouTube is this: "The Apollo 20 belongs to all mankind It is a part of all human's heritage."

On Apollo 20's insignia you can read this, from Virgil: "*Carpent tua poma nepotes*, (maybe we are those grandchildren). – We know that Apollo 20 landed on the far side of the Moon outside the Izsak-D crater, the location of the city of knowledge, among others. The whole area belongs to the aliens, who have joined the descendants of Sumer. One example is Inanna who became their leader. William Rutledge has extensive knowledge of Sumerian culture according to his 2007 story. More info at *Visitors to the Moon, final*, pp 73-84. - William Rutledge told Luca Scantamburlo in 2007 that EBE Mona-Lisa is alive, and she is here with us, i.e. reincarnated in Christer R.

More info at *Man, God and Science*, pp 30-39.

The second former American astronaut to appear in connection with Apollo 20 was "MOONWALKER1966DELTA". In 2008 he contacted the Italian journalist and writer Luca Scantamburlo. Among other things he said that he, during a spaceflight, had had an accident and survived. He also mentioned the lunar program Clementine. He said he was the commander of Apollo 19, but around three weeks before take-off the whole crew was replaced. He also described Apollo 20's landing site on the far side of the Moon. This landing site was the same as for Apollo 19, so was the mission. – His survival at that time would have happened during a secret lunar mission, like those of Apollo 18, 19, and 20. – These secret lunar missions took place at some time between 1993 and 1999 when the Apollo/Saturn projects were abandoned. Instead, the American **Space Transportation System (STS)** had started, as had the corresponding Soviet **Buran Transportation System (BTS)**. The former astronaut Rutledge did not like the new transportation system with space shuttles. Let me have a closer look at the combination Clementine/STS concerning lunar missions.

The pictures below show eight American space shuttles, manufactured between 1970 and 1990.

The CCCP also produced space shuttles almost simultaneously, eleven Buran "Snowstorm" space shuttles. The Soviet space shuttles were not successful and they are now also retired.

The differences between the American and the Soviet space shuttles are minimal. The US and the Soviet Union co-operated and the US and Russia have continued.

Two much smaller space shuttles, the American *Dream Chaser* and the Russian, *Clipper*, were developed for the future.

Space Shuttle Program

Former astronaut **MOONWALKER1966DELTA** related that he had survived an accident, probably during a spaceflight. The launch site was Vandenberg Air Force Base in California and he was the commander. His story was fairly brief, so something happened at that time. William Rutledge told Luca Scantamburlo that he was involved in an accident during a spaceflight together with **MOONWALKER1966DELTA**. He has confirmed that he met Rutledge for some reason in connection with the flight but he also claimed that Rutledge was not involved in the accident, which Rutledge should know about. It was obviously an abortive spaceflight. – Could it have been Clementine 9's unsuccessful manned flight which was launched from Vandenberg with **MOONWALKER1966DELTA** As commander? Let us have a closer look at what happened during space shuttle Clementine 9's lunar mission in the mid-1990s.

In those days, in the 90's, the Soviet Union had its **Mir** space station orbiting the Earth. The American space shuttles Atlantis, Discovery and Endeavour have also joined the station.

Space shuttle **Atlantis**: STS-71, 1995; STS-74, 1995; STS-76, 1996; STS-79, STS-81 1997; STS-84, 1997; STS-86, 1997;

Space shuttle **Discovery**: STS-63, 1995; STS-91, 1998;

Space shuttle **Endeavour**: STS-89, 1998;

The first docking at Mir took place on February 3, 1995 with Discovery STS-63 and Endeavour accomplished the last one on January 23, 1998.

The pictures demonstrate how the docking between the space shuttle (Atlantis) and Mir was carried out during the 1990s.

We know that the eight space shuttles Columbia, Challenger, Discovery, Atlantis and Endeavour carried out space flights around the Earth and docked with the space stations Mir and ISS. Challenger and Columbia were lost. The remaining Discovery, Atlantis and Endeavour carried out their last flights in 2011.

Space shuttle Pathfinder

Space shuttle Explorer/Independence

Space shuttle Enterprise

Space shuttles Pathfinder and Enterprise were never launched, but were used as valuable test models. Today there is only one space shuttle, Explorer/Independence which was manufactured in parallel with Endeavour in 1992-93. We know that the Department of Defense, the DOD, had its military mission and it was managed from Vandenberg. The army also had a space shuttle, probably Explorer/Independence, the space shuttle which was never mentioned publicly. Let us have a closer look at the space shuttle Independence, also called Explorer.

Space shuttle, STS, Space Transportation System's official insignia.

Another insignia showing the transportation of the space shuttle between the Earth and the Moon, called *Collect Space*.

Picture of the space shuttle Explorer or Independence. We can clearly see the insignia *Collect Space* on this space shuttle. The insignia is an illustration of the transportation between the Earth and the Moon. This insignia cannot be seen on the other space shuttles. Explorer was built in Apopka, Florida by Guard-Lee in parallel with the space shuttle Endeavour and at the beginning of 1992 it was transported by air to Kennedy Space Center in Florida. It is possible that Explorer was secretly tested at Kennedy Space Center, was launched with an anonymous crew and landed after a couple of orbits at Kennedy Space Center.

The picture shows, behind the STS-49 crew, the space shuttle Endeavour at Kennedy Space Center on May 7, 1992. The same vehicle and the same crew that made their first spaceflight with STS-49. We know that the DOD had its own mission next to NASA and NASA also so-operated with the DOD. I believe that the DOD rented the space shuttle Endeavour from NASA at some time between 1995 and 1999 for their own defense missions e.g. the Clementine lunar mission. – We clearly see that there is no difference between the right sides of the Explorer and the Endeavour. I have named this space shuttle (Explorer) the **Invisible** space shuttle.

Here we can see a space shuttle orbiting the Earth. It is carrying an object similar to the lunar model LM and probably another large satellite. If this is correct it means that a new type of lunar module is being tested by the space shuttle crew. We can also see that there is room for two lunar modules in the space shuttle's cargo compartment. The crew can use the space shuttle's crane to remove objects from the cargo department. Note that the object looks like a lunar module but it could be something else.

Clementine #9.

What is the difference between a Clementine lunar probe and a manned lunar module? – Technically there is no difference. One is somewhat bigger than the other but the landing procedures are similar. One touches down automatically (directed by ground control) while the other is run manually. In the 1990s STS has replaced the Apollo spacecraft.

LM=Lunar Module

In the 1970s the combination LM/Apollo was the best tool for landing on the Moon. **LM-1, Test-LM**, Apollo 5 22/01/68, (not manned); **LM-3 Spider**, Apollo 9 3/3/69; **LM-4 Snoopy**, Apollo 10 18/5/69; **LM-5, Eagle**, Apollo 11 16/7/69; **LM-6 Intrepid**, Apollo 12 14/11/69; **LM-7 Aquarius**, Apollo 13 11/4/70; **LM-8 Antares**, Apollo 14 31/1/71; **LM-9**, Kennedy Space Center Visitor Complex; **LM-10 Falcon**, Apollo 15 26/7/71; **LM-11 Orion**, Apollo 16 16/4/72; **LM-12 Challenger**, Apollo 17 7/12/72; **LM-13 Liberty**, Apollo 18/12/74; **LM-14 Artemis**, Apollo 19/12/75; **LM-15 Phoenix**, Apollo-0 16/8/74; **LM-16 Clementine**, Explorer -1993 or 97?

A possible journey to the Moon. The space shuttle docks with space station Mir. Fuel is provided for the lunar module and some Soviet cosmonauts board the space shuttle, then take-off for the Moon. As far as I understand, the space shuttle was the best and safest vehicle for visits to the Moon. The cargo compartment can hold two lunar modules, one lunar roving vehicle and other tools they need for their mission.

I will now try to reconstruct the flight to the Moon according to the short story told by **Moonwalker1966deltas**. The flight started from Vandenberg and landed on the far side of the Moon outside the Izsak-D crater. It would have taken place in the 90s, after Apollo 20's successful lunar program. (I choose the 90s because the Apollo 19 crew died shortly after take-off after a collision with an unknown object and neither NASA nor the USAF assigned the same mission and landing site to two Apollo missions. As far as I understand, Apollo 20 had the same assignment as did Apollo 19.) But Clementine 9 will land at the same site.

Space shuttle Explorer

Space shuttle Explorer/Clementine 9 before launch at Vandenberg Air Force Base in California

Vandenberg Air Force Base, California, 1993 or 1997. At night, in the dark, the STS-Clementine 9 took off from its launch pad to carry out its lunar flight mission. **Moonwalker1966delta** was the commander, he probably did his seventh and last spaceflight. This astronaut belonged to an élite, like William Rutledge. Experience, skills and total balance were his strength. The top-level pilot Rutledge had taken part in an earlier spaceflight with Apollo 20. The Clementine 9 crew was carefully selected, maybe the most secret crew so far. All in all seven individuals were on board to the Moon, among them the Jesuit/Lord and some Russians.

The correspondence between William Rutledge, Moonwalker1966delta and the Italian journalist Luca Scantamburlo reveals that they were in an accident during a spaceflight. The astronauts do not lie, they just tell the story briefly and distinctly. Moonwalker1966delta was not a member of Apollo 20, and Rutledge did not take part in Apollo 19. If they ever were on the same spaceflight it must have been after the Apollo program was abolished, in connection with the Clementine lunar program during the 1990s. They were both around 65 years old. Compare this to John Glenn. He orbited the Earth in Mercury 6 in 1962 and 36 years later, in 1998, he made his second and last flight with STS-95, being 77 years old. Glenn was born in 1921.)

What I know about the Space Shuttle Clementine's lunar mission is that it docked with the space station Mir. There fuel for the two lunar modules was provided and a few Russians, maybe three, boarded the space shuttle Explorer. After this they headed towards the Moon and their mission, called Clementine 9, started.

A possible illustration showing how the lunar module Clementine, with its crew, is removed from the cargo compartment of the space shuttle Explorer.

In this picture LM-Clementine descends towards the surface of the Moon using a gyroscope. A gyroscope has an amount of properties that can be used in different contexts. The spin axis always tries to maintain its orientation, pointing at the same direction. This is useful in ships, aircraft and spaceflights. The orientation stability is used to stabilize vessels and vehicles and in this case helps Clementine to maintain its direction without any change. To be able to touch down safely on the surface, telemetry must also be fully functional in order to avoid losing the correct distance between the surface and the lunar module.

According to Moonwalker1966delta the gyroscope stopped working during the descent. He mentioned that some kind of smoke had come from the panel, a warning bleeper started. After that telemetry completely collapsed. Catastrophe was imminent, but they could still communicate with Houston in Texas. Our interpretation may be that the lunar module was on its way to land on the far side of the Moon when catastrophe struck. As soon as you are at the far side of the Moon, communication is impossible.

He continued to report that as soon as power was restored he manually stopped the gyroscope in order to be able to handle the lunar module Clementine until it hit the surface. But it was not a true soft landing.

Backup LM

LM-Clementine

As far as I understand both of them survived the accident but the lunar module Clementine was so badly damaged that it was unusable. Should this be true it means that Clementine's landing was the most dramatic and difficult landing in modern history, a landing handled skillfully by **Moonwalker1966delta** using his experience and balance.

Back-up LM

Backup LM interior

An illustration of the backup lunar module by the Izsak-D crater on the far side of the Moon

Take-off from the surface of the Moon

It distinctly emerges from Moonwalker1966delta's story that the spaceship with him and his fellow astronauts had been badly damaged. If it was a lunar module destined for landing it means that they needed a new lunar module to return to Earth. As far as I know they had brought an additional lunar module in the cargo compartment of the space shuttle and they activated that one. William Rutledge was the space shuttle's pilot and it was he who landed with the backup lunar module and picked up Moonwalker1966delta and the Jesuit. In this particular case there were three passengers in the backup lunar module. –

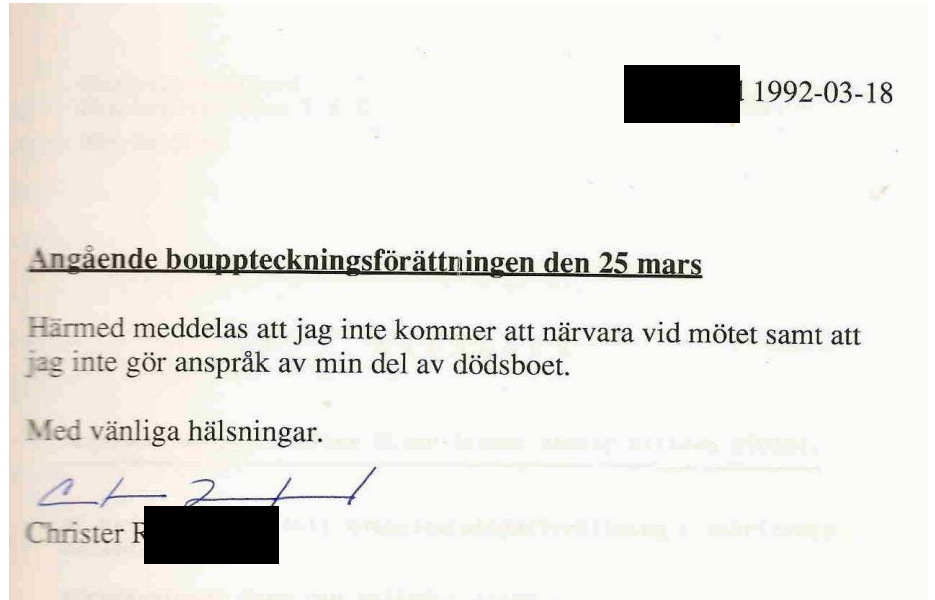

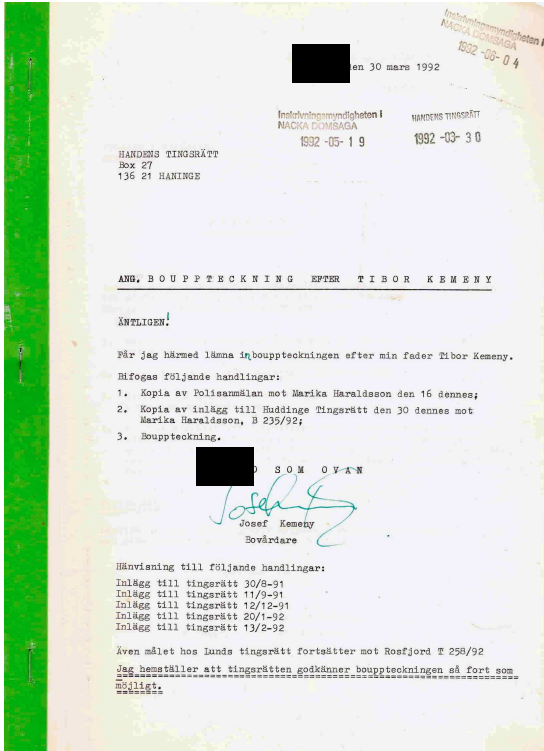

Rutledge related that he was in an accident in space with Moonwalker1966delta, but the latter claims that Rutledge was not, he did not meet him until after the accident. An outsider who reads Luca Scantamburlo's message gets the idea that one of the astronauts is lying.

But that is not the case. They both say the same thing, but their starting points are different. Rutledge was not involved in the actual accident but was part of the crew, as the pilot, and landed with the backup lunar module to free the two astronauts who were trapped in the Clementine lunar module. Moonwalker1966delta was involved in the accident but after a successful landing he met Rutledge who had landed next to Clementine to make sure that Moonwalker1966delta and the Jesuit were returned to the space shuttle. After that the return journey started, the docking with Mir and the touch-down at Kennedy Space Center in Florida. It is obvious that this is all about an unsuccessful lunar flight but the question about when it happened, this most mysterious spaceflight in our time, remains to be answered.– All this thanks to the Italian journalist Luca Scantamburlo who via William Rutledge and Moonwalker1966delta documented Apollo 19's and 20's secret missions in space.

Williams Rutledge said that he became religious in 1990. He visited Ural in the Soviet Union in 1994 or 1995 after an invitation. The question remains: What did Moonwalker1966delta and the Jesuit do on the far side of the Moon in the city of knowledge? Did they meet an alien, or aliens, while they were on the Moon?

To get to the goal, to the conclusion of Clementine 9's flight to the Moon, we should have a look at clues in the form of documents. Primarily we will have a look at what has happened since the beginning of the 1990s, especially at what has happened to me, since I am at the centre of events, being my father's only-begotten son.

Document 1 is the estate inventory after my good father Tibor Kemény who passed away in the spring, on May 4, 1991, in the sign of Taurus. The state inventory was finished after difficult negotiations on March 30, 1992. I handed it in to the relevant court of law and authority. In it there is a change of identities between Tibor E and Christer R. The latter was also summoned to the estate inventory function which was on March 25, 1992.

It is evident in the above letter, dated **March 18**, 1992, that Christer R renounces his share of the estate. Thirteen years earlier, at the end of 1978, during a personal telephone conversation with him, he confirmed that he did not know anything about my father and his existence and in the letter he gives up his share. Who has written this false letter in his name? It is a forgery of documents, a crime. What do you, king, say about this? The letter was dated **18**, which is my father's birthday. In the estate inventory there is also a so-called relatives report by Church of Sweden, dated June 26, 1991. The report claims that Christer R is my father's first-born son, born before me and my sister. Something I did not know at the time was that plans were already on the way, plans aiming at removing Christer R and replace him with the Jesuit. This happened during Pope John Paul II's pontificate (here we find the foundation of Christian religion, at the End of Time).

The next clue can be found at the Holy See, document 2.

Document 2.

Yes, there is evidence and in this case the Vatican itself has published it: **Predictions and Prophecies from the Diary of Pope John XXII.** A copy of a part of the diary was distributed by some groups in several Catholic churches in Metro in Manila. Priest DeAngelo was 73 years old when he consented to publishing some of the diary texts that had been written between February 1959 and April 1963 by the pope himself. The dusty, leather-bound book contains hand-written diary notations and was found by one of the Vatican cleaners who sorted boxes in a small storage. The scribbled messages expose a frightened and excited pope who has decided to keep his meetings with Christ/the Lamb and the Madonna secret. The pope writes that he met Christ/the Lamb for the first time in his chambers on February 12, 1959. He was elected pope on October 28, 1958 and as early as on **February 12, 1959**, he was allowed to meet the ten-year-old Lamb. The priest related that the pope met the Lamb regularly and had also met with the Madonna between 1959 and 1963 in his chambers. More info at *The Fourth Pyramid which Disappeared*, page 55.

The Madonna continues her visits to the pope. Their next meeting was on **May 19, 1962.** According to the diary, visitors from space (aliens) will arrive in **1995** and the Saviour will appear in the sky. Many people will fear these peculiar creatures. On **July 2, 1962**, the Madonna says that it is her last visit. Among other things she says that towards the end of 1998 our celestial friends will arrive and will share with us their advanced knowledge. Finally, on **December 25, 2000, a fantastic miracle will appear in the skies above New York City. Millions will watch the sensational appearance of Messiah who will announce the arrival of a second paradise here on Earth.** (This seems to be connected with Revelation)

What does the Madonna reveal here? Between 1995 and 1998 the aliens will influence the situation here on Earth. The Clementine lunar mission, a secret project, took place between 1993 and 1999 in co-operation with the aliens and on December 25, 2000, Messiah was supposed to appear above the City of New York.

Document 3.

The Clementine lunar program is America's message to the world, it has been on the Internet for many years. You can call this message a document irrespective of the scope of its contents.

Why was Clementine 9's journey to the Moon necessary and why was the Jesuit on board? – According to Apollo 20 we can find the City of Knowledge on the far side of the Moon, outside crater D. It belongs to Virgin Inanna/the Lamb and the aliens. The Lamb is always welcome there and the Jesuit came there as the Lamb/Christ R. He would have returned to Earth on a spaceflight and a small flying saucer to appear above New York. The aliens knew that the Jesuit/Bull was neither identical with the Lion Tibor E nor with the Lamb Christ R. So, the Jesuit had to return to our Earth in the space shuttle Explorer/Clementine 9. This is how I interpret Clementine 9's mission.

This is what we were supposed to see in 2000, at midnight on Christmas Eve above New York. Messiah (the Jesuit) would have appeared in front of the flock of sheep during John Paul II's pontificate according to Black Madonna's **predictions** given to Pope John XXIII in 1962. But what happened? There was no Messiah show. Instead, on the Vatican's website, a picture of a totally naked Lamb/Christer R appeared. (More info at *Aries, Capricorn and the End of Time*, page 23)

What did the Madonna say to Pope John XXIII? "Finally, **on December 25, 2000, a fantastic miracle will appear in the skies above New York City. Millions will watch the sensational appearance of Messiah who will announce the arrival of a second paradise here on Earth.**" If we try to understand what she means by "Messiah" we will get the answer to why there was no Messiah appearance. We know that the original, worldly and Davidian Messiah, the Lion of Linköping, Tibor E, was murdered in 1971, so he was not available. The Lamb, Christer R, wants to get his hybrids/virgins together on Mount of Olives in Jerusalem in order to leave the Earth, this is linked to Revelation. But there is a deity called **Jehovah-Baal**, who wants to continue his life here on our Earth, a paradise – but for whom? This Messiah is Mammon, the Messiah of money and wealth, Antichrist/the Bull. My father's paternity issue was brutally crushed in the 1970s and the estate inventory after my father was not handled correctly. The Jesuit can never claim to be my father's son, as can Tibor E. It seems as if the aliens have disconnected him.

But many people may want to ask the question: Why New York? That is a very good question and I am sure that many people around the world want an answer. What makes New York famous all over the world? **The Statue of Liberty**. Let me have a closer look at this statue and at how she ended up there.

The origin of the 7-pointed crown was Enki in Sumer. This was Enki's symbol and it also reminds us of the 7 tribes of the Huns and Hungarians, the 7 worlds at different levels of vibration in our galaxy, the 7-branched candlestick and the 7 stars and 7 hills of Revelation. The figure 7 is an extensive and important symbol and is now located in New York. I will come back to the torch later.

The lion is the King of animals and a symbol of the monarchy, the Lion of Judah.

The Lion of Giza depicting Pharaoh Cheops

Symbol of St. Mark's Basilica in Venice, the Bull Mark as a false lion. He was murdered in Egypt, buried in Alexandria and his remains were brought to Venice either in 815 (by Pope Leo III, 795-816) or in 828 (Gregory IV, 827-844). A winged lion means symbolically that the Bull belongs to a group of aliens. The sword is a symbol of power and war.

The Lion of Belfort

The artist and sculptor Frédéric Auguste Bartholdi has one remarkable piece of work in Europe, *The Lion of Belfort*, which is a massive sculpture of a lion chiselled out of a mountain in Belfort i Territoire-de-Belfort, around 70 kilometres from the German border. The lion is 22 metres from head to tail and 11 metres high. It is supposed to symbolize the fight by the French troops against the Prussian army towards the end of the Franco-Prussian war 1870-71. This is the well-known, official explanation, but there was one more, silent motivation: The Lion of Corsica. He worked on the lion sculpture between 1875 and 1879. The popes were Pius IX (1846-1878) and Leo XIII (1878-1903).

Édouard René Lefèvre de Laboulaye, 1811-1883
 Writer, historian, politician and jurist

Laboulaye was a prominent figure in the struggle against oppression and slavery, not least in his *Histoire politique des États-Unis 1620-1789* (3 vols, 1855-66), where he expressed his enthusiasm for American social structure, and the satire *Paris en Amérique* (1863). As a poet Laboulaye won European fame, especially for his colourful oriental novel *Addallah ou Le trèfle à 4 feuilles* (1859). He achieved considerable work in his area of speciality, jurisprudence, e.g. by publishing *Revue historique de droit français et étranger* (1855-69 and 1877-83).

The historian and writer Édouard René Lefèvre de Laboulaye was thinking of how to celebrate the 100th anniversary of the Declaration of Independence in the USA.

The sculptor **Frédéric-Auguste Bartholdi** was commissioned to create a monument for the end of 1876. This was supposed to be raised in Port Saïd in Egypt with the motto “Egypt Enlightens Asia.”

Isma'il Pasha/Khedive, 1830-1895

Briefly about Isma'il Pasha: Son of Ibrahim Pasha, born on December 31 in Cairo, died on March 2, 1895, near Constantinople, khedive (viceroy) of Egypt. Isma'il got a European upbringing in France and came back to Egypt in 1849. His uncle, khedive Said Pasha, used him at missions in France and Italy and appointed him to the government. In 1861 he led the government in his uncle's absence and subdued a rebellion in Sudan. After the death of Said on January 18, 1863 he became Khedive of Egypt. His external policies aimed at full independence,(direct relations with foreign monarchs, the Turkish firmans about the order of succession in 1866, the Khedivate in 1867, the position of Egypt in 1873) and his flamboyant and costly enterprises (the Suez Canal, opened in 1869). Reforms as brilliant as they were ill-conceived resulted in a swindle which ruined his country. Add to this his private extravagant life of "an Oriental despot with a Parisian varnish" and he ended up in the arms of European usurers. After he had been disposed of on June 26, 1879, he spent his time in Europe, especially in Italy, from 1888 to his death, partly as a state convict on the castle Emirgian by the Bosphorus, provided by the Sultan.

It was Isma'il Pasha/Khedive who, because of financial difficulties, could not receive the Statue of Liberty from France.

There are reviewers who claim that the Statue of Liberty is a copy of Apollo. The Americans themselves have concluded that Clementine is a copy of Apollo. This can be true, according to the pictures.

We can see that the Statue of Liberty is neither man nor woman, it seems to be a hybrid/virgin, just like Apollo and Clementine.

The pictures suggest that Clementine, the Statue of Liberty and Apollo have traits in common. We can see that the secret lunar program Clementine is based on Apollo, i.e. the virgin/hybrid.

The role of the torch is to enlighten the Statue of Liberty's message to New York. We know that the statue is neither man nor woman but a hybrid/virgin, i.e. the Serpent (Lamb). New York is called **The Big Apple**. The apple is a symbol in the Bible, a symbol of knowledge which was and still is prohibited, the Lord says. It seems as if also our Lord picked and ate the forbidden fruit in order to hang on to world power. This is the Apple's message from the Christian religion, represented by the torch. (An intellectual battle between the Lamb/Serpent and the Bull took place on July 4, 1776. I can only notice that exactly 200 years later, in July 1975-76, the court proceedings against my father started. They were about paternity and alimony to the Lamb/Christer R without his knowledge, but in his name). More info at *Aries, Capricorn and the End of Time*, pp 1-6.

We return to Clementine 9's lunar mission and try to establish a point in time for the launch from Vandenberg and compare it to the time when **France** gave the Statue of Liberty as a gift to the US to celebrate the 100th anniversary of when **France** gave her as gift to the USA to celebrate the 100th anniversary of the Declaration of **Independence** on July 4, 1776. "France" and "Independence" are clues here. We know that Clementine I was launched on January 25, 1994. Clementine 2 was cancelled in 1997, but that year Clementine **France** was sent to the Moon on December 3. This mission was probably Clementine 9. The space shuttle was called Explorer/**Independence**. So, there is a clear connection between Clementine 9's lunar mission and the Statue of Liberty. The Clementine 9 crew may have included three Americans: Moonwalker1966delta, Commander William Rutledge and the Jesuit. Add two Russian cosmonauts and two French (ESA) astronauts.

The American flag looks fake.

Was the Clementine mission a "false flag operation"?

How many red stripes does the American flag have? "7"

How many do we see? "5"

How many white stripes does the American flag have? "6"

How many do we see? "5"

The Americans have concluded that the flag on Clementine's insignia represents three nations. But which are they? According to the Statue of Liberty they are the US, France and Russia via space station MIR = peace, freedom, world.

It was not a fake flag, it was genuine according to the secret mission. All flags have the colours blue, white and red.

Let me have a closer look at the space shuttle Explorer/Independence.

If we take a close look at the space shuttle we can see that it is a bit different from the other seven space shuttles. This is obvious behind the cockpit. Its original name was Explorer but it was renamed Independence in memory of the Declaration of Independence on July 4, 1776. It got a new, symbolic name: **The Spirit of Texas**. I believe that Independence was the modern space shuttle in the 90s and equipped with world-leading technology. Independence spent 18 years at Kennedy Space Center Visitor Complex, Florida and was seen by around 12 million tourists, according to NASA. Those who looked at the space shuttle could see that it had been subjected to atmospheric friction, it had been in space. In 2012 it was moved from Kennedy Space Center to Space Center Houston, Texas. We are absolutely sure that both NASA and USAF/DOD lacked space shuttles after the Challenger and Columbia accidents. Endeavour and Explorer/Independence were built almost simultaneously to replace Challenger and Columbia during this crisis. It is unlikely they built space shuttles for billions of dollars just to show them off, they could use Pathfinder and Enterprise for that. Explorer/Independence was introduced to the world as a showcase but only NASA and USAF know how many secret space flights the shuttle had accomplished. If a project is secret to everybody except for those involved you do not have to tell the public about it, but Clementine's secret lunar project was at least partly presented by the proper authorities. Clementine's lunar mission was, as far as I understand, secretly connected to my father's paternity issue. In those days people believed that the handling of the issue by the head of state, the king, had been correct here in Stockholm. I can also mention that the Lamb/Virgin Christer R visited the US at this time. Note that this is my personal opinion founded on known clues, see documents 1-6 above. We also have Nostradamus at our disposal.

Nostradamus is said to have anticipated many things, but did the French prophet anticipate the landing on the Moon? This quatrain is said to anticipate the landing. Or the fake landing, according to some.

Dedans le coing de Luna viendra rendre,
 OÙ sera prins & mis en terre estrange,
 Les fruicts immeurs seront à grand esclandre,
 Grand vitupere, à l'un grande louange.

Did Nostradamus anticipate the landing on the Moon?

"He will come to and find a corner on the Moon / There he will be captured and held in a strange land / The unripe fruit will cause great harm / Vast guilt but also great celebrations."

If we analyse Nostradamus's texts we shall find that they are not about the Apollo landings since there were always two astronauts on the Moon in the Apollo programs. Nostradamus writes about one single individual who is a prisoner and has arrived in a foreign country without permission.

The only person to fit Nostradamus's prediction is the Jesuit in connection with Clementine 9's lunar mission. The whole mission was carried out to benefit the Jesuit and he was the main character at the landing in the city of knowledge on the far side of the Moon. The Bull, the Jesuit, journeyed as Christer R, with Christer's/the Lamb's identity. In Sweden he is claimed to be identical with the Lion Tibor E, who was supposed to be my father's biological son. Only the change of names took place according to the Stockholm monarchy.

The city of knowledge belongs to Inanna/the Lamb and is the territory of the aliens, no Bull is welcome. After the problematic landing he became a prisoner according to Nostradamus, we do not know for how long. (Neither Moonwalker1966delta nor William Rutledge says anything about this, they talk about an accident during a lunar mission and they finally safely returned to Earth. The unexplainable telemetry accident was managed by aliens, which is how I understand the situation. There is a very interesting text in Revelation 12:5: "She bore a male Child (Tibor E) who was to rule all nations with a rod of iron. And her Child (Christer R) was caught up to God and His throne." The Jesuit is nowhere to be found. – The unripe fruit which Nostradamus mentions are the authorities involved in the Clementine lunar program. Nostradamus, too, says something about the Moon and the landing. A brief conclusion: The Earth is a planet of lies but even lies contain clues which finally bring clarity.

The Moon visit. W. Rutledge mentioned a visit to the Moon lasting for 7 days. Did he mean Apollo 20 or Clementine 9? As far as I can understand from reading all material, its visit to the Moon lasted for a day and a half, around 36 hours. The whole voyage took 7-8 days. If Rutledge meant Clementine 9 instead, the question is: what did the crew do during a week on the Moon? – After having read Moonwalker1966delta's very brief but yet rich description of the surroundings of the lunar landing site on the far side, in combination with Nostradamus, my conclusion is that that the Jesuit/Bull was imprisoned the whole time, i.e. 7 days, while Moonwalker1966delta was free and could, maybe assisted by a guide, visit parts of the area since he could give a detailed description of the landing site and its surroundings and simultaneously communicate with the space shuttle Explorer. There is no information of at what time Rutledge joined with the extra lunar probe but he was obviously allowed to land and set free Moonwalker1966delta and the Jesuit. The lunar probe is temporary housing, but where were the Jesuit/Bull during a week? At a secret place at a secret level of frequency.

This picture shows that that the left foot of the Statue of Liberty/Virgin is chained, like that of the Lamb above. It is still not time for the Lamb, but it is getting closer. But since the Jesuit took over the Lamb's forged identity documents, he too is paralysed. The Jewish little boy Tibor E was murdered without cause and was innocent. He was not my father's biological son and did not appear in the 1958 document concerning paternity. That is why Christianity is now disintegrating. Tibor E was my father's foster son, my father knew him well. Christer R was the child of my father's cousins. The secret Clementine lunar program was thus connected to my father's, Tibor Kemény's paternity issue. But my father had nothing to do with the Jesuit. He will never manage to steal my family tree. More info at *Foundation Stone*, page 70. (Why was the program called Clementine 9? In those days people thought there were 9 planets orbiting the Sun. In my opinion, the program was supposed to comprise the whole solar system.

The Statue of Liberty was neither man nor woman but a hybrid/virgin crowned with the 7-pointed crown.

The Moon deity Chang'e is neither man nor woman, i.e. a hybrid/virgin. Crowned with the 7-pointed crown.

If we continue the Statue of Liberty topic we can find her counterpart in China, the Moon deity Chang'e. China is the third largest space nation and carried out a successful moon landing in December, 2013, with their lunar probe Chang'e 3. It would be very interesting to have a closer look at her and analyse available material.

The 7-pointed crown with two horns looking like those of a ram.

The Moon deity Chang'e is on her throne with a 7-pointed crown on her head, just like the Statue of Liberty in New York. At her left foot is lion, looking up at her. The lion is her most dangerous enemy and has roots far back in Sumer, where Marduk killed her. In my opinion Chang'e was a reincarnation of, among others, Tiamat/Inanna.

The Moon deity Chang'e on her throne, raising her her right hand like the Lamb/Jesus in Palestine and future popes did as greetings. She wants to deliver a symbolic message. On the shield in her arms is a lion. She seems to have chosen a female role in those days.

The Lamb/Jesus's ascension in a space ship from Mount Tabor in ancient Palestine.

Moon deity Chang'e's flight to the Moon or ascension reminds us of that of the Lamb/Jesus. Here she says goodbye to her husband Hou Yi.

The so-called "Moon Festival" was fairly popular during the Tang Dynasty 618-907 and the Song Dynasty 960-1279. It was connected to the memory of the Moon deity Chang'e and the two basic elements Yin and Yang. Sacrifices to the Moon were executed very early in China and the start of the dark six months of the year was also attributed to the Moon deity as was the theory of Yin and Yang. But what is Yin and Yang?

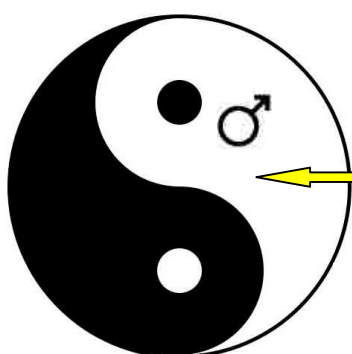

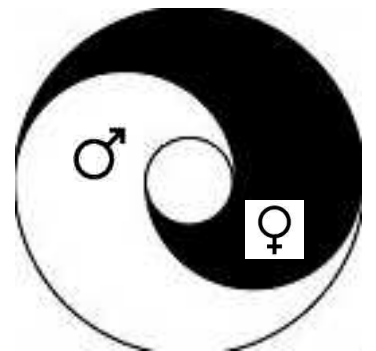

According to Chinese philosophy Yin and Yang are symbols of the extremes, they are the primordial forces of the Universe. There is a number of definitions and comparisons connected to Yin and Yang. Yin represents the woman, Yang the man. If we analyse Yin and Yang we can see that the signs depict a unity of two different individuals, a unity of man and woman. Two individuals melt together.

The conclusion of the Yin and Yang symbol confirms that it is a **union** between man and woman. We can clearly see that from the starting point two different personalities of opposite sexes split up but still form a union. Thus: Yin and Yang are neither man nor woman, but a hybrid/virgin.

In my opinion this an oriental symbol of a virgin/hybrid. The circle is a symbol of eternity. If you are a hybrid, you are a hybrid forever.

The letter **M** is a western counterpart of Yin and Yang.

The Moon deity Chang'e as a high priest or female pope on her Moon Throne. In one hand she holds the book which is about being a hybrid/virgin, in the other hand she keeps the crossed silver and gold keys necessary for her existence as a hybrid/virgin. At her foot is a symbolic lioness/tigress.

Chang'e stole her husband, archer Hou Yi's elixir of immortality and at her ascension she withdrew to the Moon. She is therefore looked upon as the mother of the Moon and possibly its goddess, this story has many versions. On the Moon there was also a certain Wu Gang hewing away at a constantly self-healing cassia tree as a punishment for earlier sins. A jade rabbit which helps Chang'e to mix her elixir of immortality can also be seen on the cold and unfamiliar Moon on the Tang Dynasty bronze coins. What is recorded, what does all this mean? What secrets are revealed?

The story of the Moon goddess starts when she steals the elixir of immortality from her husband Hou Yi. Then she ascended to the Moon and goes on mixing the elixir. This short record reminds me of the incident in Sumer when Inanna stole the "Tablets of Destinies" from her maternal grandfather Enki and then went to the far side of the Moon.

Eternal Life is mentioned on the Tablets of Destinies, a blood transformation from animal blood into human. The elixir of immortality is a fluid like blood, thus a symbolic name of the blood transformation process. The question I ask is: Who was Hou Yi? Could he have been the scorpion man Enki? But Enki was never married to the Serpent goddess Inanna or was he married to her when she was called Chang'e?... It seems as if Hou Yi was hostile to Moon goddess Chang'e because she stole the knowledge of the elixir of immortality from him just as Inanna stole the Tablets of Destinies and knowledge from her maternal grandfather Enki. In those days the Hungarian ancestors were still in Asia.

The cassia/cinnamon tree is a symbol. If we take a closer look we will see an animal-like creature under the roots. It seems as if the tree symbolically grows out of this animal which has been planted into a human-like body and whose blood is trying to be transformed into human blood. In the Bible this tree is an "apple tree" in the Garden of Eden.

In this story, the improvement and production of the elixir of immortality continues on the Moon. The white Jade Rabbit and a man called Wu Gang lend a hand.

On the Moon there is also a certain Wu Gang hewing away at a constantly self-healing cassia tree as a punishment for past sins. A jade rabbit which helps Chang'e to mix her elixir of immortality can also be seen on the cold and unfamiliar Moon, according to the story. What does this mean??

The painting depicts the Jade Rabbit symbolically stirring the liquid in a bucket, illustrating the production of the elixir of immortality on Earth. In this way the production of the elixir was interpreted.

This painting depicts the Jade Rabbit on the Moon, continuing its research on and production of the elixir of immortality. Instead of a bucket there is advanced equipment in a laboratory in connection with the blood transformation process. You can also see the picture as a rectangular area of, for example, the city of knowledge. The Jade Rabbit leans over it, on the far side of the Moon.

A painting of Chang'e in her garden. You can see a long, wriggling serpent below her feet, the serpent staring at the hare. – The Hare, Serpent and the Dragon exist in Chinese horoscopes.

A brief summary tells us that the Serpent in this context is a symbol of Chang'e's animal origin. More info at *Obscure Magyar*, the first pages. But the Moon/Serpent goddess Chang'e has an incontestable rival who is always close behind her.

We know from the Apollo 20 spaceflight that there are buildings in the city of knowledge on the far side of the Moon. They are Inanna's scientific centre for the blood transformation process.

There is a modern laboratory, a scientific institute where research on the blood transformation process still goes on. The story says that Moon goddess Chang'e ascended to the Moon after having managed to steal the improvement of the blood transformation process from her husband Hou Yi. She probably took part in the actual process herself on the far side of the Moon in the city of knowledge.

I believe that the Jade Rabbit works there in a human-like body as does the man called Wu Gang.

This event which took place during the Tang Dynasty (619-907) is very valuable. The story reminds us that China then experienced a prospering period.

Here is the rival, the other Moon goddess Isis/Hathor, the holy Cow goddess, Isis/Hathor, sister of the Bull god Osiris and his spouse. She is a symbol of, among other things, women and wealth, luxurious life, entertainment and female power.

The rival, Empress Wu Zetian, of the Tang Dynasty 618-907, the only empress among men in China's history. The empress is on her throne and on each side there is a moon crescent. On her breast is a full moon (should the celestial body be interpreted in any other way, then Venus, "the morning av evening star" is also a female symbol, like the Moon).

This is how history remembers her, according to Wikipedia: **Wu Zetian**, born on February 17, 624 in Lishui, died on December 16, 705, in Luoyang. Chinese Empress. Many women have ruled China, but Wu is the only woman in the history of China who openly ruled with the same status as the emperors. She is the only woman who has formally been on the emperor's throne and whose name is in China's list of monarchs.

In 637 Wu became the concubine of Emperor Tang Taizong. When the emperor as removed, she was sent to a monastery but soon returned to the court as the concubine of the next emperor. In 654 she was appointed first wife and empress. In 660 the emperor suffered a stroke which paralysed him. Wu was then appointed deputy emperor and functioned like that for 24 years. When her husband died in 684 her son became the new emperor. But as he was not of age, she continued, now as a regency emperor.

In 690 her son abdicated and Wu became the monarch and the first woman to openly occupy the imperial throne in her own name. She had been a deputy emperor for thirty years. She had, however, not accepted the traditional position as "God", which was the usual thing to do. She did this in 696 and accomplished a complete equal position compared to her colleagues, a unique achievement. She ruled the country for 30 years, as a full emperor for 15 years, as a "God" for 9 years. After 45 years she was forced to sign her abdication on her deathbed.

According to history she was a beautiful woman who used her contacts to enter the Tang Dynasty and became the concubine,

mistress, of Emperor Tang Taizong. She started her career as a concubine and became the most powerful empress in Chinese history. We usually say that history repeats itself. In Egypt she ruled with an iron fist as a pharaoh called "Hathor" during Dynasty 18. People did not notice that a woman was on the throne and ruled Egypt. The only thing she cared about was power, wealth and luxurious life. Thus she was the opposite of Moon goddess Chang'e, for whom knowledge was the most important possession. She did same thing as Queen Twosret during Dynasty 19. Wu Zetian was born as a female tyrant.

Female Pope
Joan, 854-856,

Empress
Wu Zetian, 690-705,

The holy Cow goddess may have been the most powerful female regent on Earth. After she had finished her life as an Empress of China in 705, she was reincarnated in Europe and ascended the Holy See in Rome in 854 as Pope Joan to become the first and only female pope in history. She ruled Catholicism with an iron fist for more than two years. The flock of sheep did not notice that a woman was running the House of the Lord, nor did they react. Later she became known as **Empress Dowager Cixi**, known in China as **Empress Xiao-Qin Xian Tsu, 1835-1908**. She has, in other words, ruled in Egypt, China and Europe and her iron fist was bloody. More info at *Foundation Stone*, pp 59-60. When it comes to religion: in Europe Christianity was by leaps and bounds ready to conquer the continent and in Asia Buddhism was already popular.

Buddha Siddhartha Gautama,
(BC 403-483) A combination of a lion and an elephant. Siddhartha Gautama was enlightened below the fig tree. According to him, Buddhism is founded on knowledge about our universe and galaxy. His colour was that of the Sun, he was dressed in yellow. According to records, he ended up in Nirvana after death. **The sitting original Buddha Siddhartha Gautama.**

The divine Buddha Amitabha och Sukhavati, BC.
This Buddha was a virgin/hybrid and his symbol was the Moon. Dressed in red. The religion had Amitabha as a foundation with God as its focus. Buddha Amitabha, too, called himself Light.

Monk Budai lived in the 10th century and was also called the smiling Buddha. He is depicted as an obese man symbolising wealth. His religious messages about wealth do not correspond to those of Buddha Amitabhas and he has nothing to do with Buddha Siddhartha Gautamas' scientific messages. He founded a new type of Buddhism founded on wealth and power in the form of religion. He is well worth a closer examination, he is supposed to be the future Buddha Maitreya at the End of Time and will replace Buddha Gautama. He is one of the seven Bull gods in Japanese mythology.

You can see that the sack is closed and beside it there is an emblem illustrating 7 crescents. These 7 crescents are symbols of a kingdom whose monarchy has 7 kings managing the Moon's issues in secrecy. You can see that sack is placed on the crown, on the king's head, i.e. it is he who is in power and he is responsible for secret issues.

Monk/Buddha Budai/Hotei, the future Buddha Maitreya with a sack in his hand now at the End of Time. Picture by woodcut artist Utagawa Kuniyoshis, 19th century. The message is a masterpiece.

The right arm is a monarch/king and on his head is a royal crown. On the crown is a closed sack, i.e. the monarch rules in secrecy.

We can see how the monarch covers Buddha Budai's eyes with his hands from behind Buddha Budai's back.

The drawing depicts how Buddha Budai with his right foot holds a male sexual organ which displays various signs. This is a symbol of a paternity issue, inhumanly and illegally influenced by him.

The message on this picture by the artist Utagawa Kuniyoshi (1840-50) is this: Buddha Budai will be the next, or the last, Buddha now at the End of Time. This drawing has no counterpart on this planet. It illustrates the Bull's reincarnation at the End of Time as the last Buddha Maitreya and the Bull Jesus/Antichrist within Christianity. The drawing depicts a paternity issue at the End of Time in kingdom whose royal family has 7 kings. Sweden, with the Bernadotte royal family is such a kingdom.

The king manages a paternity issue which is depicted as a closed sack which is powerfully influenced by Buddha Maitreya, or the Bull Jesus himself, at the End of Time. He pays the king a large amount of money but the latter deceives Maitreya/the Bull Jesus and the Bull is trapped. – He bought a pig in a poke. The Bull cannot control the king's secret actions. This is the message from the artist Utagawa Kuniyoshis which he announced in parallel with the Karl Johan XIV dynasty in Sweden. He grew up during the Napoleon era (the artist was born in 1797 and died in 1861). More info at *Prince of Ponte Corvo or...*

The message in this context is understandable if you compare it to the original, i.e. with my father's paternity issue which is the most secret issue in the world seen from the monarchy's perspective, here symbolised by a closed sack.

The picture depicts the Buddha Budai era. An elderly monk looks into the mirror to see who the happy, lovable Buddha is who jumps at him from behind.

"Sack of cloth"

"Sack of cloth"

The End of Time. Buddha Maitreya, a reincarnation of, among others, Buddha Budai. Primarily I want to analyse the name "Budai". The name comes from the pagan Hungarian name "Buda." He was Attila's elder brother and lived in AD 445. He shared with Attila the kingdom of Pannonia in Hungary. The Hungarian capitol Budapest was named after Buda, situated at one side of the river Danube. It is evident that Buddha Budai will return at the End of Time using the name Buddha Maitreya, the way Jesus Christ will replace Buddha Gautama. More info at *Man. God and Science*, pp 1-7.

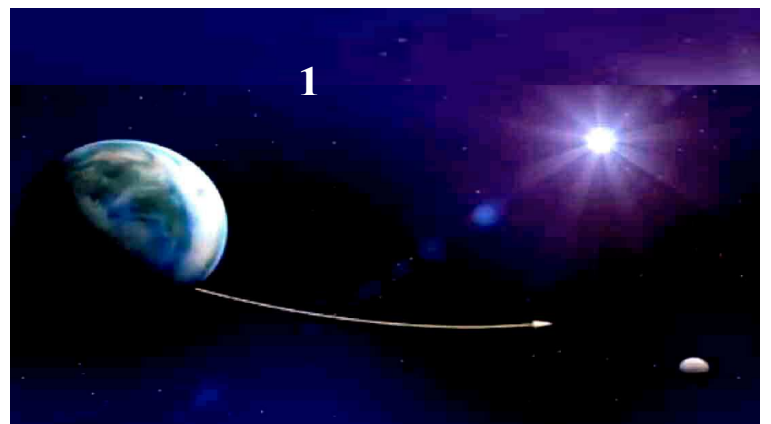

The picture above shows a sitting Buddha Maitreya (the Bull god) and below his feet are lotus flowers. He is dressed in a yellowish colour, like the Sun, against a blue background. The Sun's symbol is a lion and the Lion, Tibor E, was murdered in 1971. He was replaced by the Lamb Christ R/the Moon who was removed in 2007 and replaced by the Bull, the Jesuit. The Lion Tibor E was disposed of in a black sack in a grave at the Catholic Congregation graveyard in Stockholm in 2012. Tibor E was a reincarnation of, among others, Attila, who was Budai's younger brother. More info at *Prince of Ponte Corvo, or...* pp 50-69. - In his dream Constantine saw a cross in heaven and heard the voice: *In this Sign You will Conquer*, in Latin *In hoc signo vinces*, *the E sign in a cross*. In other words: the pig in the poke. Briefly: Buddha Maitreya and the Bull Jesus Christ/Antichrist are one and the same person.

Moon Goddess Chang'e to the Moon. Chang'e 3 landed on the Moon

The lunar probe Chang'e 3 was launched on December 1, 2013, from Xichang Satellite Launch Center, China. China was the third nation to succeed in putting a probe, named Chang'e 3, onto the Moon.

Picture 1 shows how Chang'e 3 leaves the Earth behind and starts to orbit the Moon on December 6, 2013, picture 2. The landing site is on the front side of the Moon, in **Sinus Iridum**.

Sinus Iridum Chang'e-3

December 14, 2013

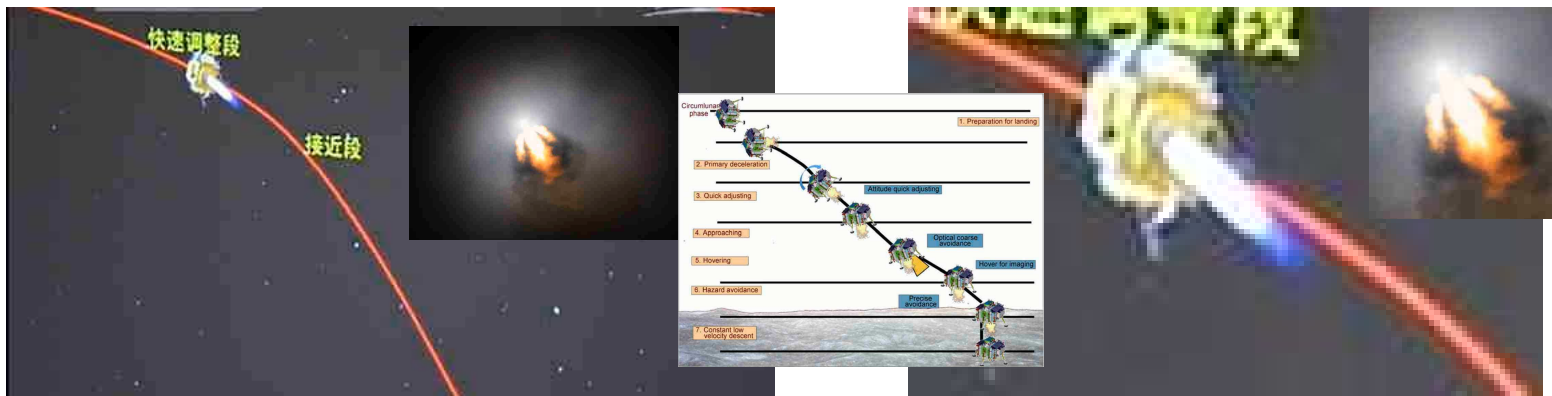

On December 14, 2013, the Chinese lunar probe Chang'e 3 touches down on the front side of the Moon in Sinus Iridum, close to the Laplace A crater.

China National Space Administration (CNSA) had from the start planned the landing to take place in an unnamed crater, with a diameter of 249 kilometres, a fairly big crater, but the probe landed softly near the crater Laplace A. This is the first mystery concerning the flight to the Moon and the landing.

Lunar probe Chang'e-3 descends above the Sinus Iridum to make a soft landing.

The Moon Goddess Chang'e 3 landed in Sinus Iridum close to Laplace A crater, but why did the space vehicle land near a crater which was not on the agenda? It is an early mystery at the start of the visit, at the La Place landing site.

The lunar roving vehicle was named *Yutu* or the "Jade Rabbit", a name chosen by the people on the Internet. It comes from Chinese mythology where a white rabbit lives on the Moon. We can see the lunar roving vehicle (the Jade Rabbit) and how it approaches the surface of the Moon.

The white Jade Rabbit leaves the space vehicle, a live broadcast to the ground station.

The Jade Rabbit started to roll.

The pictures above show how the Jade Rabbit leaves Chang'e 3 to commence its journey in a certain area. The lunar probe Chang'e 3 is alone at the landing site.

The map shows the Jade Rabbit's journey during the first week after touch-down.

The white Jade Rabbit leaves the lunar probe Chang'e 3...

...and is on its way to explore the nearest surroundings.

The Jade Rabbit approaches a very interesting area, a completely new site turns up in front of the lunar roving vehicle. The exploration took place in the evening or at night.

In front of the vehicle you can see a very large "pyramid" with various surrounding building structures

A large pyramid among buildings with style and structures similar to those on Earth.

You can see buildings to the right and to the left of the pyramid. It looks like a small community or a small town.

Myth from AD 600, reality in AD 2000? A certain Wu Gang is said to be hewing away on the Moon at a constantly self-healing cassia tree as punishment for past sins. A Jade Rabbit helps Chang'e to produce her elixir of immortality ("past sins" may refer to the time when eternal life was lost, i.e. lost its human self).

The lunar roving vehicle Jade Rabbit drove straight towards buildings and a pyramid. There is also a pyramid on the far side of the Moon, outside crater Izsak-D, in the so-called City of Knowledge. Research on eternal life and the blood transformation process are still going on there at least when it concerns the Moon goddess Chang'e. The original landing site was planned to be at an unnamed crater with a diameter of 249 kilometres, but Chang'e landed near Laplace A. The pictures clearly tell us that explorations were carried out in the evening or at night. More info at *Man, God and Science*, page 32

This is the area explored by the lunar roving vehicle/Jade Rabbit during its active phase. This can be called a small community or a town, the "CASSIA TOWN", for knowledge, i.e. a new city of knowledge on the front side of the Moon, in Sinus Iridum.

The questions remain: Who decided that Chang'e 3 would touch down at the Laplace A crater? And was the roving vehicle turned directly towards the pyramid? Before Chang'e 3 landed in Sinus Iridum, astronomers, among others, have spotted a so-called Moon base there. Such a base can, for example, be a small community or town with various activities, an inhabited area.

In my opinion, the aliens have built a new city of knowledge in Sinus Iridum and named it "Cassia Town". A new research area concerning eternal life. In other words: A continuation of the research about the blood transformation process from animal to human blood with the pyramid at the centre. The new scientific institute of research was introduced in AD 600. The Jade Rabbit works there in a human-like body, and Wu Gang. Moon goddess Chang'e's ascension finally ended in Cassia Town (city of knowledge) in Sinus Iridum, where she was subjected to a so-called scientific blood transformation process. After that she was reincarnated in Poland as "Stefan/István" in around AD 975. This is how I understand the message from the Tang Dynasty in connection with the ascension of the Moon Goddess and the elixir of immortality connected to eternal life. Kina comes closer to Hungary via the history of the Huns.

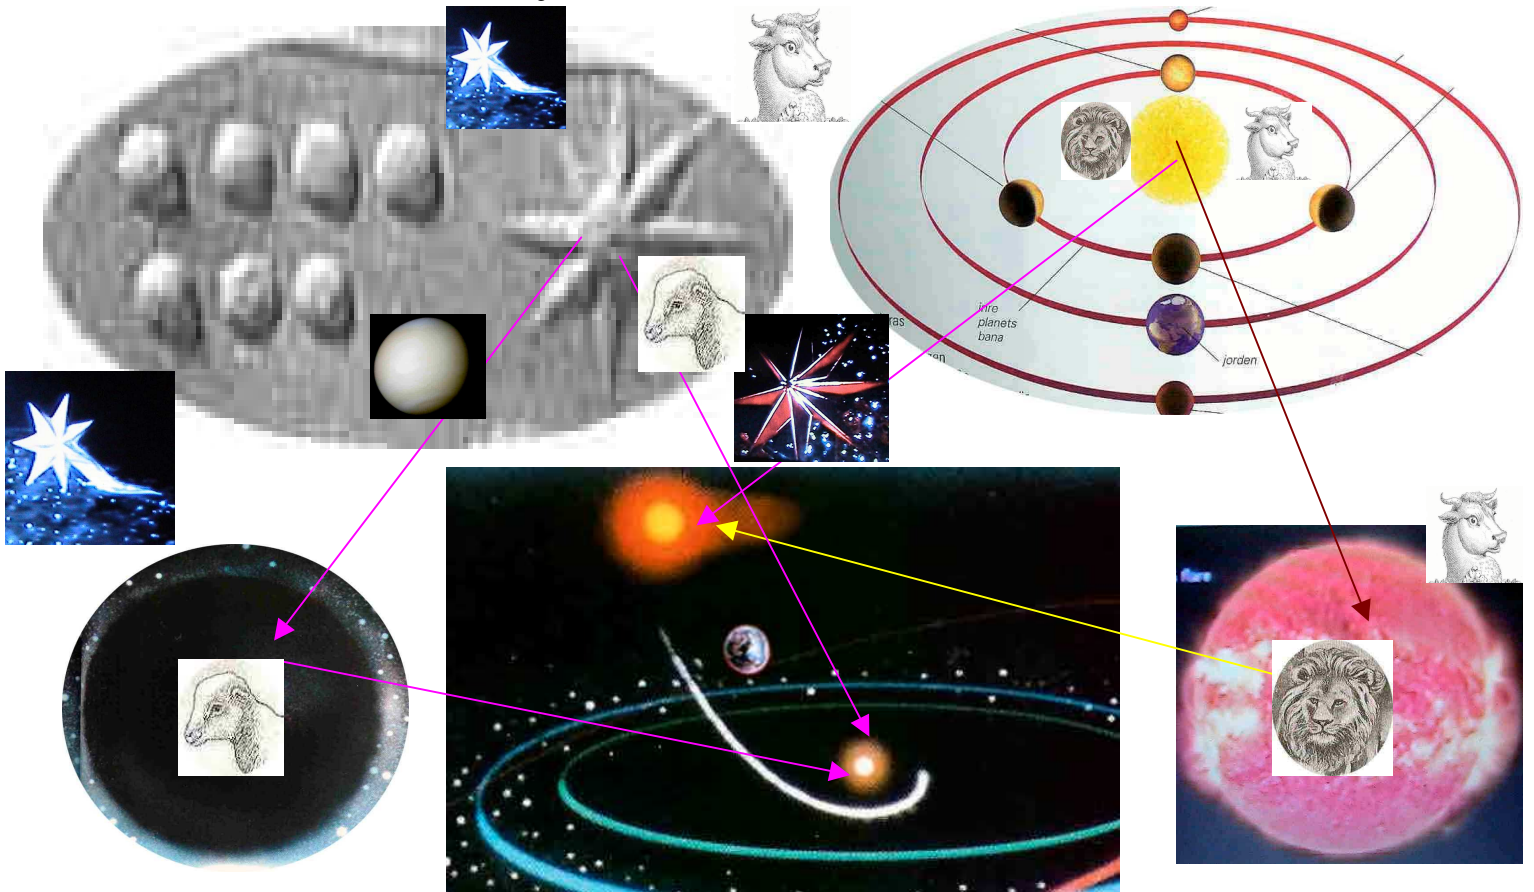

More info at *Obscure Magyar*, page 23. According to some records, the communication between Chang'e 3 and ground control was severed at the end of January, 2014.

According to **Apollo 20** there is a city of knowledge on the far side of the Moon, close to the Izsak-D crater and according to Chang'e 3 there is a more modern one, Cassia Town in Sinus Iridum, devoted to the blood transformation process. Why two institutes but only one area of research? Well, the ultimate goal for Moon goddess Chang'e/the Serpent goddess is to become human again, she has established two competing scientific institutes. Which institute will win the race?

She did the same as the competitors, the Mayas, Incas and Aztecs here on Earth. More info at *Mayas-Incas-Aztecs and their Secrets*. More info on Apollo 20 at *Visitors to the Moon final*, pages 55, 61-85.

They have advanced so much that Moon goddess Chang'e/the Serpent deity, is called the Star Goddess by the neutron star Nemesis.

A Symbolic Race

The 7- (8-) pointed neutron star Nemesis and its 7 (8) planets constitute a solar system which in Revelation and the gospels is called Heaven. John (the Baptist), a reincarnation of Julius Caesar, was the first to preach about Heaven by the river Jordan in those days. More info at *Ancient Persia and its Secret*, page 9. Heaven will soon appear as a giant comet and everyone will see our Lord's Heaven. Since this neutron star is the strongest one in the solar system it belongs to the Lamb, according to its wish. The Sun is a symbol of the Lion, a six-pointed star is bigger but weaker than the neutron star. The Bull now fights to conquer both the Sun and the neutron star Nemesis. The Bull, too, calls himself the Sun, the Lion. More info at *Man, God and Science*.

Sun researchers and astronomers around the world know that the Sun's magnetic field is weaker. Thus the Sun is at a disadvantage compared with the neutron star Nemesis which causes global climate change and natural catastrophes.

The Ultimate Day

Nostradamus' prophecies

502. Sooner and later you will see great changes made,
dreadful horrors and vengeance.
For as the moon is thus led by its angel
the heavens draw near to the Balance.

503. The moon is obscured in deep gloom,
his brother becomes bright red in color.
The great one hidden for a long time in the shadows
will hold the blade in the bloody wound.

504. The year of the great seventh number accomplished,
It will appear at the time of the games of slaughter:
Not far from the great millennial age,
When the buried will go out from their tombs.

505. The present time together with the past
Will be judged by the great Joker:
The world too late will be tired of him,
And through the clergy oath-taker disloyal.

506. When twenty years of the Moon's reign have passed
another will take up his reign for seven thousand years
When the exhausted Sun takes up his cycle
then my prophecy and threats will be accomplished.

Michaeleric de notre dame

This is Nostradamus' conclusion in connection with the Moon and the Sun. It is important to have a closer look at his conclusion.

Nostradamus was either Issachar's or Naphtali's descendant according to records about him and his family.

The Sun at a disadvantage compared with the neutron star.

506.. When twenty years of the Moon's reign have passed another will take up his reign for seven thousand years. When the exhausted Sun takes up his cycle then my prophecy and threats will be accomplished.

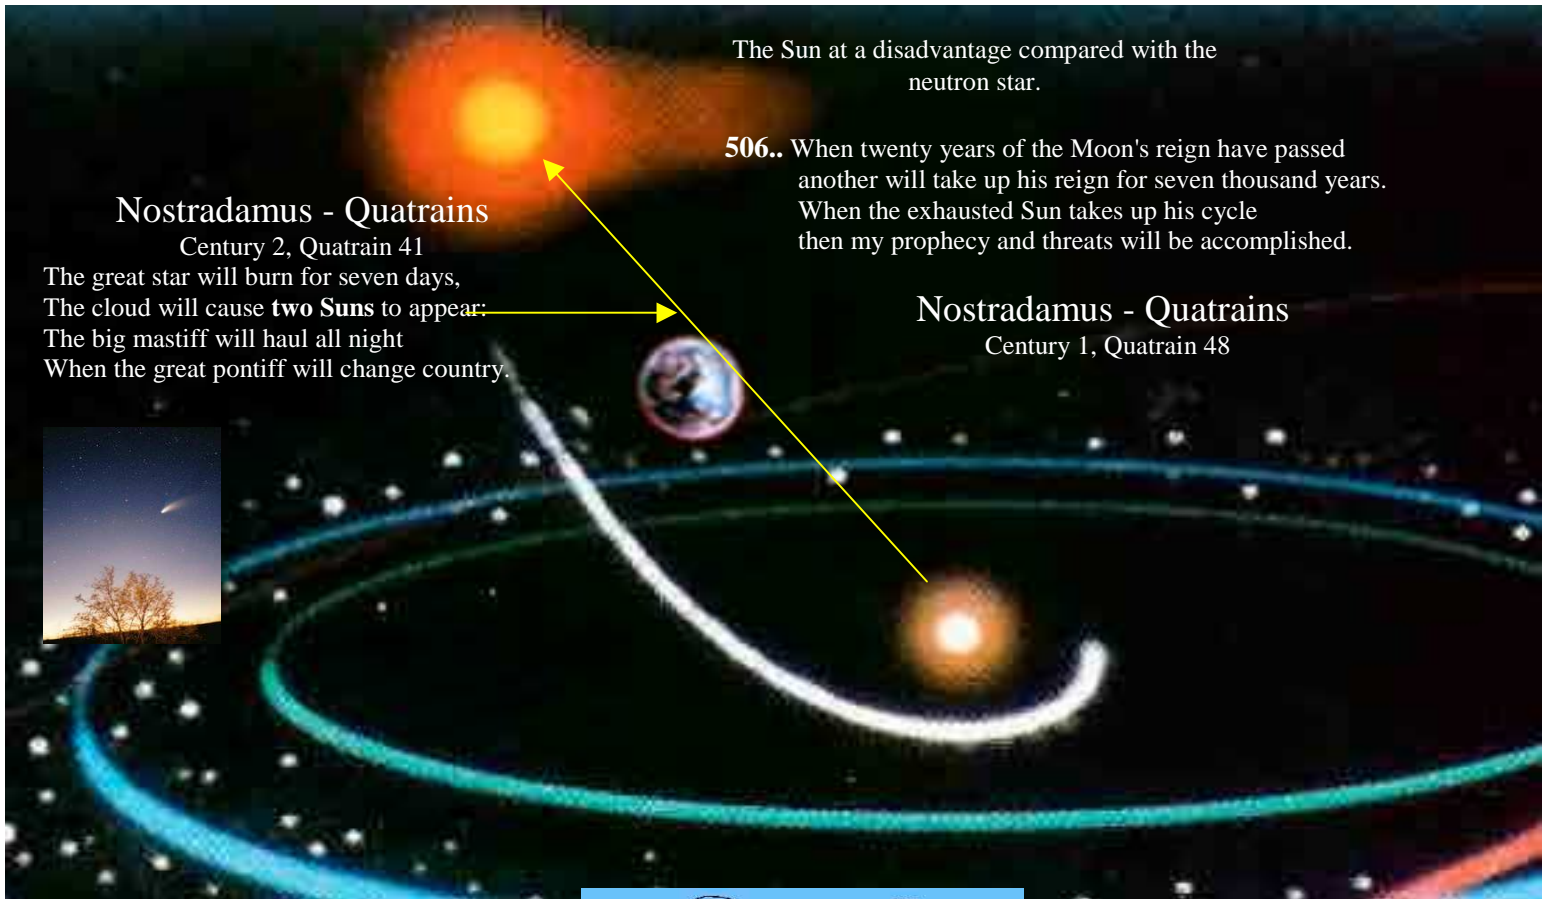

Nostradamus - Quatrains

Century 2, Quatrain 41

The great star will burn for seven days,
The cloud will cause **two Suns** to appear:
The big mastiff will haul all night
When the great pontiff will change country.

Nostradamus - Quatrains

Century 1, Quatrain 48

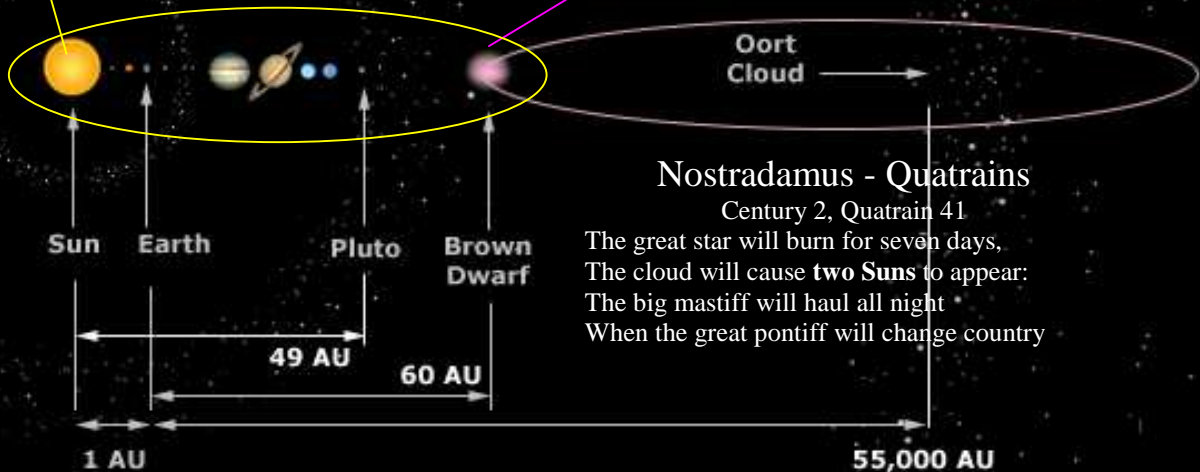

The neutron star's pentagonal orbit around the Sun is around 3,600 years. 2 x 3600 equals 7,200 years which corresponds to quatrain 506, 7,000 years above.

Nostradamus - Quatrains

Nostradamus: "The New Church" from quatrain 494 to 501, see *Visitors to the Moon, final*, pp 102-103.

Nostradamus: "The Ultimate Day" is the conclusion of his prophecies from quatrain 502 to 506.

In quatrain **502** Nostradamus means that that false religion and science cause oppression and the end will come. The Earth is a planet of lies.

Quatrain **503** is about the Sun and the Moon in a combination of astrology, astronomy and religion. The Lion/the Sun is murdered (religion), the Sun is at a disadvantage (astronomy/science), the Moon/Virgin/Lamb exists in the dark (religion, astronomy) and the Great One (Jupiter) hides in the darkness but is also known as a mass murderer.

Quatrain **504**. Nostradamus describes my father's invalid, brutal paternity issue which reached its climax in 1977. This coincides with the dark Middle Ages, the Millennium starting with Pope Sylvester (1000) up to John Paul (2000). All who died then are reincarnated now.

In quatrain **505** Nostradamus describes the name Jehovah/Jahveh, who will, among other things, be a judge. The name is complicated from the very start, according to the Bible and certain researchers it means **I am that I am**, but the true meaning is **I will be what I will be (I will turn out to be)**.

אֶהְיֶה אֲשֶׁר אֶהְיֶה

Ehyeh-Asher-Ehyeh

"I will be what I will be"

God expressed this name during the exodus from Egypt. This God who led the exodus aided by Moses and Aaron was the Serpent God who also called himself **Abraham's, Isaac's and Jacob's God – Jahveh/Jehovah**. This god corresponds to the Lamb/Virgin in connection with judgement day in Revelation and God's Son. – **5, Jesus said**, "Know what is in front of your face, and what is hidden from you will be disclosed to you. For there is nothing hidden that will not be revealed." – The fact that Moses and Aaron were not allowed to see God's face was because Akhenaten was God, known all around Egypt, and there was a great risk that if Moses and Aaron could see this face, they would lose respect for God.

The name Jehovah/Jahveh (=he is), was also used by the Bull God/Jesuit, e.g. Our Lord Jehovah. Another name which both of them used is "Adonai", which means *master*, and/or *my Lord*. Cosmic Adam, Lemech, Joseph and Tibor Kemény were jacks of all trades, *masters*, in those days probably called "Adonai.". You can also say that a master is master of his own activities and knowledge.

Nostradamus, too, kept the Serpent God Jehovah and the Bull God Our Lord apart.

Since religion is humbug, we shall forget Our Lord (Baal) and God. People have had enough of inhuman brutal religion based on lies, advocated by the clergy.

They still do the same things. They mix different individuals into one person, for example my father Tibor Kemény's paternity issue. This is a fact.

In quatrain 506 he ends his prophecies. He sees the end of our solar system and the end is complete when our Sun is really at a disadvantage compared with the neutron star. Then it totally dominates the Sun. The result will be various terrible natural catastrophes, also here on Earth. They will have no counterpart in the history of the Earth.

He sees that the next empire will last for seven thousand (7,000) years. The neutron star's pentagonal orbit around the Sun is around 3,600 years. $2 \times 3,600 \text{ years} = 7,200$. The neutron star will orbit twice before the end of the next empire, maybe in the same way as now, when it is about to put an end to the present empire.

Natural catastrophes are already ravaging the whole globe and the Sun is at a disadvantage compared with the neutron star Nemesis. This is a phenomenon well known by astronomers.

Now it is time to build the ark again, a survival project vital across the globe!!! This survival project is the most important project on this planet. It includes the construction of as many arks as possible all over the world. This will also become a gigantic global industrial venture

Knowledge and capital supplement each other. Top-level knowledge is a valuable investment especially now at the end of time with various gigantic natural catastrophes. In other words: You should know in advance how to plan and implement a survival project across the globe despite the current natural catastrophes. Time is short!

If you are an entrepreneur or private individual with some money and want to invest in Life, you are welcome to contact me here: info@cosmic-construction.com This is what you need: humanity, honesty, reliability and solidarity. There are no religious issues involved. The aim is to start a global business with a limited number of applicants. Please write why you wish to join us. All letters will be answered. If we take a closer look at the Apollo project it looks fairly extensive, like a labyrinth. Most people on our Earth do not take its program seriously, including the visible and hidden part of it, which is an advantage for the project. The question is how many of the Earth's population have understood its true signification. Large amounts of top secrets gave as a result that even those who were authorized found it difficult to form a correct opinion on the activities within the lunar project. Let us have a closer look at the project, with my eyes. It is important for all humans on this planet.

The Moon is a mystery. There are a number of groups of aliens of various races and origins on both the front and the far side of the Moon. It seems as if they have divided up the Moon between them, certain areas belong to certain groups of aliens. It is fact that there are moon bases all over the Moon. One example is the base found by the astronomer before Chang'e-3 landed at Sinus Iridum. It is not easy to get a landing permission from unfamiliar UFO members.

We now understand that Apollo 18, 19, and 20 were cancelled. Apollo was, by the way, a very complicated, difficult and sensitive program with no counterpart in modern history. The lunar program Clementine was a prolongation of the Apollo program.

A large explosion was discovered in Mare Imbrium, Sea of Showers, on March 17, 2013. That is where Luna 2 crash-landed in 1959 and Luna-17/Lunokhod 1, achieved a soft landing in 1970. Apollo 15/Falcon landed in 1971 in the **Apennines**, at the southeast edge of Mare Imbrium.

USA/NASA, the Soviet Union/Russia and China know much about the Moon and its secrets. The public was allowed to share these secrets thanks to NASA/USA and China's open lunar program Chang'e. We know that UFO monitored the whole Apollo program from beginning to end and knew exactly what was going on around and on the Moon during the 70s and 90s.

But the most remarkable occurrence was however that the Apollo program took place in parallel with my father's paternity issue, the world's most secret issue now at the End of Time. Now, when time is ripe, the world can also share my father's paternity issue. Let me, again, have a closer look at the 70s in the Kingdom of Sweden and analyse that, not least because that time was also called the **Sunrise**. The Lamb, Christer R, paid a visit to the USA.

Cabinet meeting at the Castle of Stockholm, October 3, 2014

SVT (Swedish Television, public service) arrived at the cabinet meeting in good time. A lady-in-waiting welcomed the reporter.

The lady-in-waiting gives information on the procedures, how the king will meet the new government. He will shake hands with the ministers and deliver a short speech.

The lady-in-waiting was very happy and satisfied, maybe she was thinking about the finish of the meeting, organized by the king.

The government arrives to the cabinet meeting at the Castle at noon. The prime minister and the other ministers are going to meet the king.

The ministers have found their chairs round the table and are waiting for the Head of State. After this meeting the new government is officially at work.

The head of state arrives with his daughter Victoria. They greet the speaker and the new prime minister.

The king and Crown Princess Victoria shake hands with members of the new government.

The king and Victoria shake hands with the minister of culture. She is already working with the court writing a biography of Victoria. She has been a member of the Green Party for three days. She is the great surprise of the new government.

The head of state, the king, his daughter Victoria and the government with the prime minister.
To finish the cabinet meeting, the king referred to an old "trick".

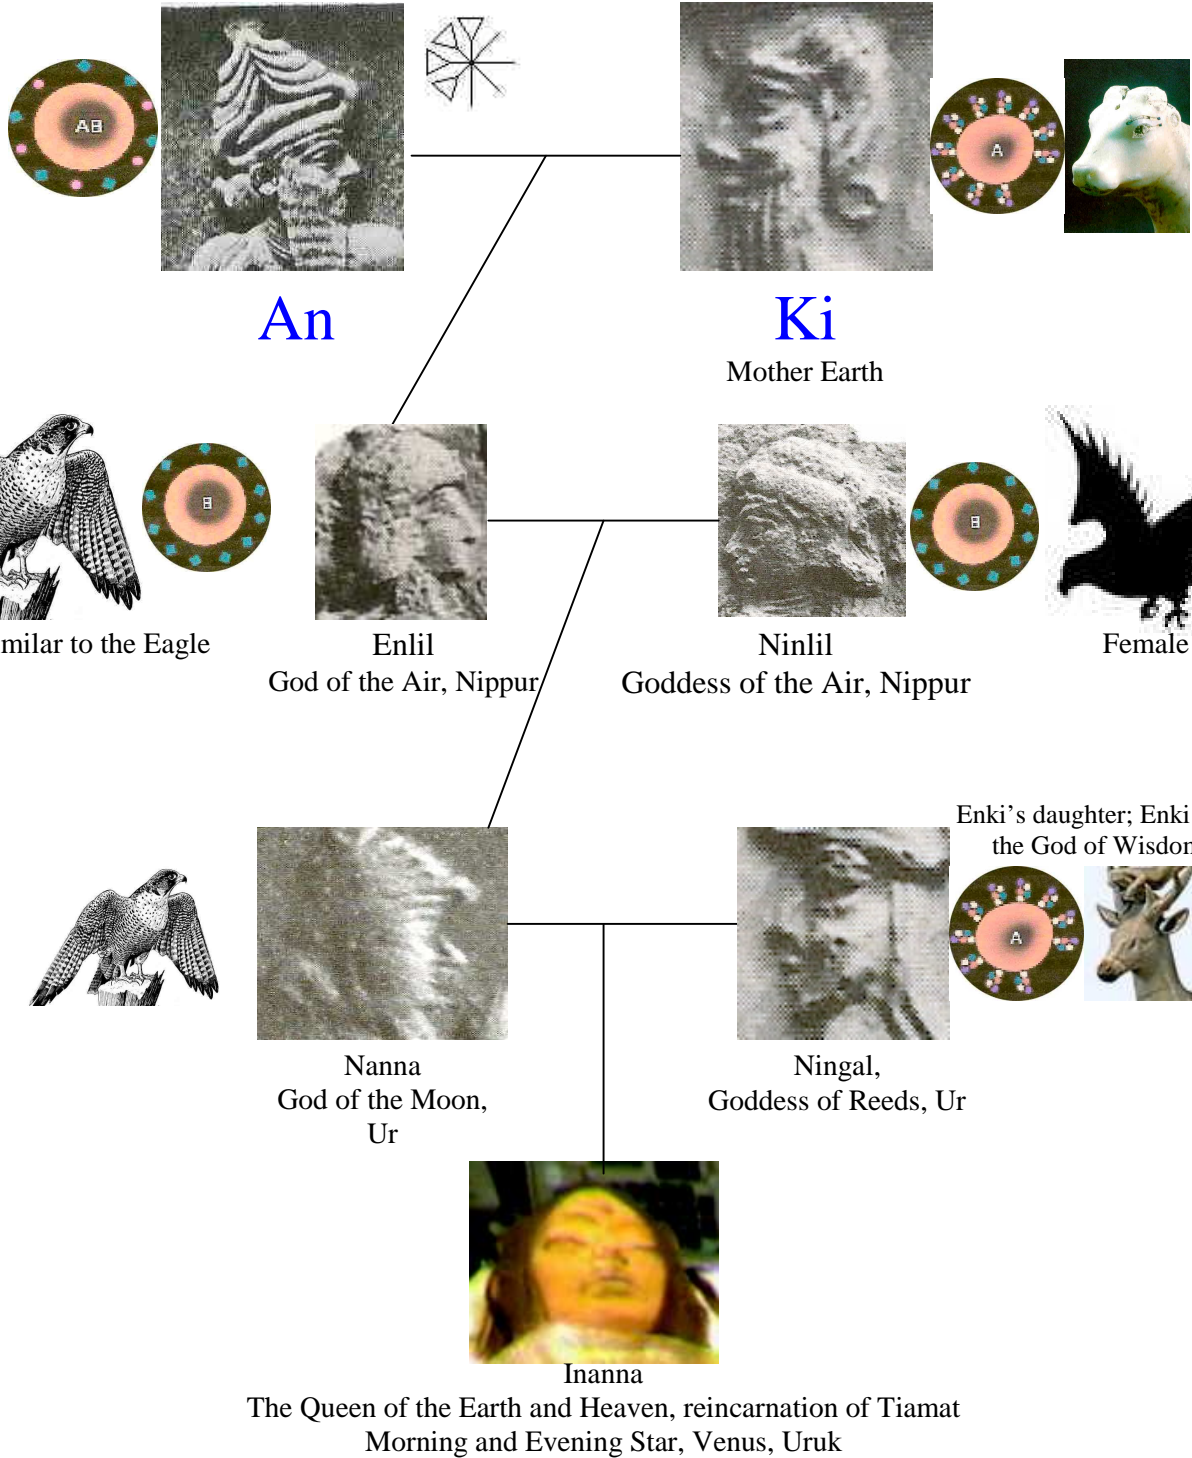

This is the king's so-called "trick". When it was performed at the end of the cabinet meeting, the audio was cut by the court and the lady-in-waiting demonstrated how the new ministers were to move to a certain distance from both sides of the table after instructions by the king. After this the king was satisfied. This was broadcast wound the world and the audio was restored by the court. Thereafter the ministers were excused, in the name of Wisdom.

We can see the trick from the king's and his daughter Victoria's chairs, a "V" sign, victory for Victoria.

If we look at the trick from the front, we clearly see the V-sign, victory for Victoria. What did the king mean with this trick, the sign of victory? How many people in Sweden and around the world have understood the king's old so-called trick? Have the new government and the prime minister understood what they took part in together with the king and the court? Before the meeting, the lady-in-waiting did not explain anything about the king's secret trick at the end. To better understand what king is secretly doing and what he means by his V-sign trick, please read the following 20 pages. Then you will understand the king's message to the world via the new government on which he exerts powerful influence, not least at the Advisory Council of Foreign Affairs, which he chairs.

Almost everybody knows about Egyptian history. They also know that Egypt had three supreme gods: the Falcon God Horus (a reincarnation of, among others, Enlil), the Bull God Osiris (a reincarnation of, among others, Gilgamesh the Bull), and the Serpent (a reincarnation of, among others, Tiamat/Inanna). Among goddesses we find Mut, a reincarnation of, among others, Ninhursag and Hathor, a reincarnation of, among others, Ki/Earth Mother. The gods in Sumer moved to Egypt, and the world more or less knows about the rest. Most gods and goddesses from Sumer returned as pharaohs in Egypt.

Kronos, a reincarnation of, among others Nanna, the Sumerian Moon God, and Uranu's son

Eros, Goddess of Love, a reincarnation of, among others Ninlil, the Sumerian Air Goddess and a reincarnation of Thea.

Today's Greek mythology also exists in the form of fairy tales with fairyland characters. Behind the saga is a real world which may not have been created by the main individuals because of the battle about world power and about who is and remains the supreme god, the Lord. This battle took place in secrecy and large amounts of leaks out of context made it impossible to understand what happened. Many individuals wrote about the events according to their level of knowledge and starting point and eventually we got the mythology as fairytales. Note that I compile this text from certain clues.

The falcon which resembles the eagle also left ancient Greece and landed in Rome at Mark Antony's, a reincarnation of, among others, the air god Enlil from Sumer and, in secrecy, Horus was welcomed to Rome. There he met his competitor Julius Caesar whose symbol was an eagle. Julius Caesar was a reincarnation of, among others, Enki, the god of wisdom, and Djoser of Dynasty 3. Greek history was well known in Rome at that time and we know that the main characters returned as reincarnations in Rome, such as the bull god Zeus as Jupiter, Hera as Juno. Athena as Minerva, Apollon as Apollo, Hermes as Mercury, Artemis as Diana, Afrodite as Venus, Ares as Mars, etc. We can say that Greek mythology lived on as Roman reincarnations which is easy to understand, because the Roman empire became a world power instead of Greece. We know that Julius Caesar, whose symbol was an eagle, was a great leader. But we do not know how great Mark Antony was and what his plans were...

We know very little about Mark Antony's and Cleopatra's life together before High Priest Caiaphas left his office in Jerusalem in AD 38. Certain sources mention that **Alexander Helios** (the Sun) and his twin sister Cleopatra Selena II (the Moon) were born on December 25, AD 40, in Alexandria.

In BC 34 his parents declared him King of Kings and ruler of Armenia, Media, Parthia and all land between the rivers Euphrats in the west and Indus in the East. His twin sister was declared queen of Cyrene and Libya while their two years younger little brother became king of Phoenicia, Syria and Cilicia. Shortly thereafter he and Iotape of Media Atropatene were engaged. She was brought to him early in life to grow up together with him.

In BC 30 his parents were defeated by Octavius (Augustus) in the battle of Actium, his father died and his mother committed suicide. Their seventeen-year-old brother Caesarion is said to have been murdered shortly after the death of his parents. The ten-year-old twins Alexander Helios and Cleopatra Selene and their six-year-old little brother **Ptolemy Philadelphus** were brought to Rome as prisoners of the state. In Rome the ten-year-old twins were forced to join Octavius's triumphal procession across Egypt chained in gold chains behind a picture of their mother with a poisonous snake around her arm. Their little brother is not mentioned in the procession context.

After the triumphal procession the children were handed over as foster children to Octavius's sister Octavia Thurina Minor, who is said to have taken care of them as if they were her own children. At some time between BC 25 and 20 Cleopatra Selene II married King Juba II of Mauretania. According to ancient sources Octavius is said to have refrained from killing her brothers as a wedding present for her. There are, however, no records which mention her brothers after this. There should be if they were still alive as adults. Their fate is not known. Certain sources claim that Alexander Helios died in AD 30, but where? Mark Antony's plans for his children's future, which he made public, especially those concerning the six-year-old Alexander Helios, appointed him the King of all Kings in Armenia and other countries. Carpenter Joseph and his family lived in Armenia.

And this was the year when he left Armenia and went to Nazareth to study. More info at *Architects' Protector*, pp 1-17. When someone was appointed King of Kings it followed that he was the equal of the mightiest god in Egypt, e.g. the sun god Horus. Mark Antony's plans also implied that he was to be reincarnated through his son and then he would inherit the title "King of all Kings", a Messiah title.

As an animal he was an elephant, to be found on the reverse side of a coin

Juba II, BC 52 – AD 23
King of Numidia and Mauretania

Cleopatra Selene II, BC 40 – AD 6
Reincarnation of, among others, Ningal, Artemis

Juba II was the son of his predecessor on the throne, Juba I of Numidia. Julius Caesar brought Juba II to Rome, where he was raised. Then Augustus saw to it that he was married to a daughter of Mark Antony and Cleopatra Selene II. In BC 25 he could add part of Numidia, later Mauretania, to his realm. He became well known because of his pamphlets with historical and geographical contents. In that way he maintained good contacts with Rome. Some records claim that Cleopatra Selene II was a superior and dominant wife, i.e. she made most of the royal family's decisions. Most important to her was the Greek and Egyptian culture.

Ptolemy of Mauretania around BC 6,5 or 1 – AD 40
Last king of Mauretania
Son of Juba II

Drusilla of Mauretania the elder, around BC 8 – AD
Daughter of Juba II

Ptolemy was a strange king. Personally he saw himself as an elephant and believed he descended from Heracles (lion) and called himself a jumping lion. He was strongly attracted to ancient Egypt and Greece and he was also depicted as a pharaoh. He was attracted to the Bull god, Zeus/Jupiter/Alexander the Great. In my opinion he was born from a female branch in a human-like body which was a combination of an elephant and a lion (after his father) with blood type AB. An intelligent personality. His mother's animal origin was a deer in a human body with blood type A. An aggressive and dominant woman.

Ptolemy knew much about history and religion, the pagan religion as well as the new Christian one and he had messages about Christianity for his people. He had roots both in ancient Egypt and ancient Greece. In the picture above we can see a damaged nose, it is hard to determine its shape.

The face of an eagle or falcon on a human body.

Symbolic

The face of an eagle/falcon

On the obverse of a coin from AD 39, Ptolemy celebrated his ascension, his rule and loyalty towards Rome. On the reverse is an eagle. The coin contained several messages: 1) his origin was an eagle or a falcon, 2) the animal symbol of Zeus/Jupiter was an eagle, and 3) the loyalty towards Rome which still displays Julius Caesar's eagle as a symbol. We can see certain traces of an eagle or falcon in Ptolemy's appearance, he had something to remind us of a bird. The shape of the falcon's beak was apparent in the damaged nose. (We often say that the character of the nose can be important)

Juba II, BC 52 – AD 23
King of Numidia and Mauretania

Ptolemy I, Soter, BC 305 – 285 f.v.t, founder of the Ptolemy dynasty in Alexandria after the death of Alexander the Great

Picture 1 depicts pharaoh Ptolemy I on the coin's obverse and on the reverse is an elephant. **In picture 2** we find King Juba II on the obverse and an elephant on the reverse. Briefly: Juba II was a reincarnation of Ptolemy and their animal origins are clearly visible. Now we can understand that the royal dynasty descends from Juba II and the Ptolemy dynasty in Alexandria, Egypt.

In *Foundation Stone*, page 31, I claim that that the Herod dynasty descends from, among others, Egypt, Dynasty XIX/Ramesses, from Babylon and from Greece, i.e. from the Bull Osiris/Ramesses II to Herod the great. I find it important to have a closer look at the relation between Herod the Great, the Jewess Mariamne II and Herod the Great and Cleopatra of Jerusalem.

Herod II Philip BC 24 – AD 34

Son of Herod the Great; married to Salome II, Herodias' daughter.- Tetrarch of Batanea from AD 4. Ruled from the death of Herod in AD 4 as a tetrarch of River Jordan and land areas north-east of Sea of Galilee until his death. He extended the towns of Caesarea Philippi and Bethsaida. He executed **John the Baptist** and allowed Izates II/Jesus to continue.

Herod II Philip BC 27 – AD 33

Son of Herod the Great. From AD 4 tetrarch in Iturea and Trachonities. Married to Herodias.

Most remaining sources claim that Herod Philip, born in BC 24, was the son of Herod the Great and Mariamne II, his biological mother. We can read the same thing about Philip who was born in BC 27 and son of Herod the Great and Cleopatra of Jerusalem, his biological mother. When we read the two messages the first time they may seem fairly romantic but if we study the texts we find incomprehensible issues e.g. that the wife Mariamne II was killed by Herod in BC and that Herod Philip was born in BC 24. How could she have given birth to a son after her death? The same goes for Cleopatra of Jerusalem who actually was Cleopatra VII, the queen of Egypt who according to records committed suicide in BC 30. How could she give birth to Philip in BC 27? Who were Herod Philip and Philip, where did they come from? - After the death of Cleopatra VII all her children came to Rome and were taken care of by Octavius and his sister. Her eldest son Caesarion (from her relation with Julius Caesar) was ordered to be killed by Octavius, as was the son of Mark Antony and Fulvia Mark Antony Antyllus in BC 30. But Cleopatra's children with Mark Antony, the ten-year-old twins Alexander Helios and Cleopatra Selene II and their six-year-old little brother **Ptolemy Philadelphus** were pardoned by Octavius. In *Foundation Stone*, page 30, I write that the wife of Mark Antony initially was Octavius's half sister Octavia and that Mark Antony had established an eternal friendship with the Bull God Herod the Great, well known also by Octavius. That is why Herod the Great took care of Mark Antony's sons, Alexander Helios with his new name Philip, and Ptolemy Philadelphus with his new name Herod Philip. Mariamne II was the phony mother of Herod Philip, who was not alive. Cleopatra, however, was Philip's biological mother. Only Herod and those around him knew who the foster mothers were. The daughter, Cleopatra Selene II, was sent from Rome to the royal family in Numidia, to King Juba I where she eventually married Juba's son, Juba II. In her marriage she gave birth to Ptolemy of Mauretania who had good contacts in Rome and Jerusalem, i.e. with the Herod royal family.

Two ancient coins from that time, for comparison. One has a picture of Cleopatra, the other one depicts Philip. We can see that Cleopatra's skull structure is similar to that of Philip's and vice versa. Both noses have a typical eagle curvature and look alike. We can talk about mother and son and the fact that Cleopatra gave birth to Philip. But it happened in Alexandria around BC 40, the name was Alexander Helios. – We can ask ourselves why it happened, there must be a reason. Octavius was actually Julius Caesar's adopted son.

Salome

John the Baptist around AD 10-15 at river Jordan

At that time a man called John appeared at the river Jordan and started to talk about the approaching Kingdom of Heaven. He was a reincarnation of, among others, Julius Caesar and his symbol was an eagle. John was a knowledgeable man and he started to talk about the future, the approaching Kingdom of Heaven and multiple catastrophes at the End of Time. The topic was so interesting that people started to gather around him. Churches, houses of prayer and other meeting-places became empty and the clergy began to worry about the religion. Then also Jesus (the Lamb/Virgin), at first secretly, appeared in Palestine with his disciples. Only Jesus/the Lamb had completely understood what John meant and he was worried that he would disappear into the converted crowd. John gave new life to the ancient pagan way of washing oneself or touching water, symbolically, of course. Old times were gone and new times were coming. It seems as if people began to understand and were comfortable with the new knowledge and the new way of managing their lives, according to some sources and clues. John was an obstacle for Jesus/the Lamb and had to be removed. John was outspoken and fearless. It was not difficult to find reasons for his removal. The Herod royal family received the assignment. With Herod Philip as a leader the gang killed John. Who took part? Well, Mark Antony's two sons who were born by Cleopatra. John was a reincarnation of, among others, Julius Caesar and in real life he was falcon Mark Antony's rival.

Monobaz II, Jacob, around AD 25-40

According to Jacob and Gnosticism, Jesus/Izates had left the Earth, probably from Mount Tabor. Peter, the fisherman (Paphos bar Yehuda), followed him there, around AD 28-29. (I can add that tabor=tábor is a Hungarian word which means "camp." It also exists as a family name, e.g. "Tábori-Tabori." Add to this the word Paphos=priestly, pap=priest.

During the reign of Herod Agrippa II a man named Paul worked. He claimed to have met Jesus on his way to Damascus.

In around AD 26, the son of Jewess Mary, Joseph Jr, was crucified. After that, in around 29, Jesus/the Lamb ascended. Between 34 and 44, during the reign of Herod Agrippa, all of Jesus's disciples and Jacob bar Monobaz were killed. Jacob was Jesus's eldest brother and was killed in Jerusalem in connection with a top-secret book by Thomas, the carpenter's biological son. Jacob became Jesus, successor to the Lamb, the Righteous one. More info at *Foundation Stone*, page 37 and *The Fourth Pyramid which Disappeared*, pp 73-74.

Alexander the Great, (according to a contemporary coin)

And Baal, the Lord

Baal the Lord

Jesus Beelzebub

A coin from the time of Alexander the Great. On one side is Alexander the Great, on the other Zeus/Jupiter. We can clearly see Zeus/Jupiter on his throne. On his outstretched arm is an eagle, a symbolic animal for him, too.

The coin tells us that Alexander did not have an eagle's nose, it is more like the nose of a bull.

15-20 years elapsed between the crucifixion of the Jew Joseph Jr in Jerusalem and Jesus/the Lamb's ascension from Mount Tabor. In those days Gnosticism focusing on science and knowledge was in force. Gnosticism was created by carpenter Joseph's biological son Thomas. Jesus/the Lamb's all disciples and most members of the elite converted to Gnosticism, by then most popular in Jerusalem and all around Palestine. But after all these years a new type of movement started to distribute the story of the crucifixion all around the world. Initially a man called Barnabas appeared in the world city of Antioch. After that he came to the town of Tarsus where he met Paul who was still feared, for example in Jerusalem, because of his brutal persecution of the followers of Jesus/the Lamb. But in Tarsus and Antioch he could be of great help. This Paul claimed that he had met Jesus on the road to Damascus. The original Jesus/the Lamb/Virgin then lived in Rome as Nero and he did not meet him. The new Jesus, who he met, was the Bull God John Mark, Barnabas's cousin. The goal of this new movement was to leave Gnosticism behind, to renew it and place the Bull Jesus on the cross, as if he had been crucified in Jerusalem. In the new so-called Christian religion Paul was appointed the head leader, apostle, with disciples such as Barnabas, Titus, Timothy, etc. They were mainly active in Greece and that was sensible, since the Bull God **Zeus/Jupiter** had been active spreading pagan religion and culture and was still doing that.

Paul's and his disciples' first, second and third journey of missionary.

The Cilician Gates, a famous pass in the mountains north of Tarsus through which Paul and his disciples travelled on their second and third journeys of missionary.

Corinth, where Paul and his disciples started to spread the new Christianity with the Bull/Jesus in focus. To the left of Paul is a statue of Zeus/Jupiter on his throne. People did not know that it was all about the same god with a new name in a new religion, but he gained many followers among the pagans in the worldly city of Corinth.

A temple ruin in Ephesus in the Roman province of Asia. Paul and Christianity had to fight against the strong Artemis cult here, where the Artemis deity was at the centre.

The island of Rhodes at the busy waterway between Syria and Greece. Paul's ship was probably anchored for a short time at the port of Lindos (left) on his third journey.

The most interesting text among Paul's records was when Paul mentioned that people wanted to stone him and his followers in some towns. They did not, in other words, believe in him anymore, they claimed that Paul had lied and deceived them. In the records we can read that Jesus, after his ascension, appeared in many guises. A new Jesus, the Bull, appeared. But there was one more, one who knew about all Paul's missionary journeys and speeches. Who was the fourth Jesus who looked like an eagle? In this context there was only one who looked like an eagle, a falcon called Ptolemy of Mauretania, born roughly at the same time as the Bull, John Mark. Paul had mentioned a couple of times that when he and his disciples returned to towns where Paul had earlier preached about Jesus/the Bull, people started to throw stones at them and they had to run away. What happened? In absolute silence, in secrecy, Ptolemy of Mauretania had visited the same places with his anonymous followers and turned Paul's speeches to his own favour. In that way there were misunderstandings and hatred against Paul. Ptolemy of Mauretania was declared dead around AD 40 and about then John Mark, Paul and his disciples started their missionary journeys to, among others, the Greek places mentioned above.

Falcon Saviour

A combination of rooster and falcon

The countries of Numidia and Mauretania, as we can see from the map, lie open to places in Rome and Greece. To be able to journey to these places you cannot be a constantly sitting king. You cannot be a king and a missionary at the same time and be away from your royal duties to transport secret messages to primarily the Greeks. Ptolemy of Mauretania had good communications with the Herod royal family up to AD 44, when Herod Agrippa ruled. This is the most secret event that took place when the new religion was spread. Here comes someone who looks like the eagle and also has a message. A short conclusion is that the Bull had a strong competitor in the Falcon, the Bull god against the Falcon god. The falcon saviour as above.

The Bull god Zeus/Jupiter
A reincarnation of, among others, Gilgamesh, Osiris, Nebuchadnezzar II, Herod the Great, Constantine the Great, Otto the Great/Otto III.

Meetingplace in the Middle East

The Falcon god Hades
A reincarnation of, among others, Enlil, Horus, Pharaoh Ptolemy V, Uranus, Cronos, Ptolemy of Mauretania. Hades has a bunch of grapes in his right hand.

In Egypt he was the ruler of the Kingdom of Death carrying the name Osiris. But it seems as if he also wanted to rule in Heaven (in our galaxy).

It appears that the ancient Egyptian Osiris triad with Osiris, Horus and Isis is severed.

In the Greek divine empire Zeus/Jupiter had a strong competitor called Hades who became King of the Kingdom of Death. His wish was to become the king of all kings and gold was his favourite. In other words: wealth and fortune were the most important issues for him. Yellow is a symbol of the Sun which means he, too, competed to become a Sun king or Sun god. A Lion, since the symbol of the Sun is the Lion.

There are no contemporary statues or coins, paintings. He chose the lion as his animal symbol.

The Falcon god Ptolemy of Mauretania
He, too, was called Jesus, Jesus Mammon, and had a falcon or an eagle as his animal symbol. The statue is from his time. He was known as a preacher in his home country, a knowledgeable, intellectual king. We do not know anything about his death.

Ptolemy of Mauretania
Jesus Mammon;
"The fourth being looked like a flying eagle"

We know that John (the Baptist) was executed by decapitation by the Herod royal family. Joseph Jr, Jewess Mary's son, was crucified by the clergy and was buried almost immediately. Queen Helena's son Izates II/Jesus is known as the resurrected Jesus who ascended to the Moon. There he was subjected to a so-called blood transformation process. More info at *Visitors to the Moon, final*, pp 79-80. The rich Greek Mary's son John Mark/Jesus Beelzebub the Bull was murdered in Alexandria in 68, after the crucifixion. Number four, Queen Cleopatra **Selene II's** son Ptolemy of Mauretania, Jesus Mammon/the Falcon, who looked like a flying eagle, disappeared around AD 40. The question is where he went, which are the traces and the evidence left behind? Are there clues preserved after around 2,000 years? We know that the name Jesus includes four different individuals and that the Jesus, who was crucified, buried, resurrected and ascended to the Moon in a UFO never existed. What this means is that the fourth Jesus/Falcon also ascended to the Moon from a mountain in his neighbourhood. In that case we should be looking for him on the Moon in connection with the Apollo 20 lunar flight, on the far side of the Moon, in the so-called city of knowledge. The crew mentioned that there were two triangular spacecraft or pyramids there. They visited one of them and found two bodies. More info at *Visitors to the Moon, final*, pp 72-84. But nothing was said about the other triangular spacecraft, despite the fact that the crew visited that, too. Let us visit it and see what is in there, something the crew chose to be silent about.

Evening or night

Part of the city of knowledge

In the other triangular spacecraft is another body. Whose?
The body has a blood transformation process equipment.

We can see that the equipment for the blood transformation process is still on the face and that the nose is hooked and similar to a falcon's beak. The astronaut William Rutledge knew exactly how to film the face and the nose. It finally turned out to be fairly good evidence of the dead person's identity, the person in the other pyramid. Everybody understands that you cannot leave behind equipment on a dead man's body and admire it without any sense. Return to pages 19-21!

Inside the spacecraft the guide Jarod-1 has removed the equipment from the face and we can get a better look at the bird-like face, the face of a falcon or an eagle. The body should be that of Ptolemy of Mauretania, e.g. the Falcon god who looks like a flying eagle. This may mean that Ptolemy of Mauretania also ascended directly to the Moon after having been declared dead in his home country. On the far side of the Moon, in the city of knowledge, in a triangular spacecraft or a pyramid, he was subjected to a blood transformation process to become human again and be able to, at the End of Time, to claim that he is God's son with human blood belonging to the God who is on the throne. His mother was named after the Moon. There is one more persuasive clue connected to Apollo 19. Its lunar probe was named **Artemis**, and Ptolemy's mother Cleopatra Selene II was a reincarnation of, among others, Artemis. The astronauts Ellis and Sorokin should have landed outside crater Izsak-D in order to visit these two triangular spacecraft. This super rich animal is also part of the Christian religion and now, perhaps, the flock of sheep will understand that they believe in lies and why they are part of a flock of sheep who does not look forward or back, right or left. The clergy around the world still preach about a Jesus Christ who does not exist in the real world, but that is probably good enough for the flock.

Picture 1 is a sign that may have a message for the Earth. It exists in the city of knowledge where astronaut William Rutledge and cosmonaut Alexei Leonov drove past. **Pictures 2-8** are illustrations of the guide walking past or placing himself at the sign and Rutledge who is filming the guide walking along in black clothes. – Note that the astronauts' clothes were white. It was the aliens who showed the way to the second triangular spacecraft. In this way a fourth Messiah appeared, a Messiah looking like a flying eagle.

John (the Baptist)

John the Baptist, a reincarnation of, among others, Enki, Abraham, Zoroaster, Pharaoh Scorpion II, Djoser, Cyrus the Great and Julius Caesar. Preached about the Kingdom of Heaven and justice. Very outspoken, a highly intelligent orator. Killed by the Herod royal family. More info at *Dynasty 0 of Ancient Egypt* and *The Fourth Pyramid which Disappeared*.

The Jew Joseph Jr was crucified by the clergy and was buried in Jerusalem. He was a reincarnation of, among others, Marduk, Pharaoh Menes and Khufu, Tutankhamun, and David.

Izates II/Jesus the Lamb assumed the dead Jew's identity, is said to have been resurrected from the dead, went to the Moon where he went through a failed blood transformation process. A reincarnation of, among others, Inanna, Serpent God Uraeus, Pharaoh Menkaure, Akhenaten and Israel's god.

John Mark, Jesus Beelzebub, the Bull, pretended to be a Jew, spread Christianity and was murdered in Alexandria. His birth gave us the expression **before and after Christ**. He was a reincarnation of, among others, Gilgamesh, Pharaoh Userkaf, the Bull god Osiris, Baal, Zeus and Jupiter. One of the richest men on Earth. Mammon.

Ptolemy of Mauretania, Jesus the Falcon, who looks like a flying eagle. He, too, was secretly called Jesus, was known in his neighbourhood and spread Christianity. He secretly went to the Moon and he too went through a failed blood transformation process. A reincarnation of, among others, Enlil, Falcon god Horus (not known to have been a pharaoh), Uranus, Hades and Mark Antony. Maybe the richest man on Earth. Mammon.

At that time the Lion, Jewess Mary's son, was crucified via fiddling and fraud, a false sentence pronounced by the clergy. Today the Church claims that the individual concerned, called Jesus, was crucified. Has the world ever seen, or heard about, a rich human being who allows himself to be executed?

The so-called Role of Messiah took place in ancient Palestine. It was all about who of the candidates, according to Revelation, was to be God's (An, the heavenly Bull) son. More info at *Man, God and Science*, pp 35-36. Above you can see the Roman Catholic Church as a female symbol. The **Dragon** is also a beast who tightly holds the four candidates. Each one of the four candidates has his own arch angel, such as Michael, Gabriel, Raphael and Uriel.

The Tetramorph depicts four saviours, Messiahs. Three of them call themselves "Jesus". Which Jesus out of these three will follow the flock of sheep in Christianity? The Falcon god remains in Rome for the next 1,000 years.

Family coat of arms, Crescenzi

Theophylactus I, Count of Tusculum, 864-924

The family coat of arms was a falcon similar to a flying eagle
A rich and influential family

There is a very old document in the Vatican library. It deals with popes from AD 900 who had chessboard squares formed as falcons in their coats of arms. The document refers to Croatia, at that time a kingdom with chessboard squares on its coat of arms. It all started in the ancient city of **Tusculum** in the Latium region, situated 17 kilometres south-east of Rome on a hill which is part of the Alban hills. There lived a very rich family by the name **Theophylact**, very powerful in Rome. The family had a coat of arms which displayed a falcon built with squares in black and white or red and white (this place reminds me of the story of Romulus and Remus).

A number of popes come from this family, see above. Some of them had a falcon as their coats of arms, a falcon drawn with black and white squares. Some had three moon crescents in their cardinal and papal arms. Popes who carried the surnames Conti and Crescenzi had three moon crescents. Almost 1,000 years had passed and the Falcon god Mark Antony was reincarnated as **Theophylactus I**, while the crescents refer to the far side of the Moon. There is the city of knowledge which belongs to Izates II/Jesus/the Lamb-Serpent/Virgin. The Falcon, too, visited the area after the Lamb/Serpent at that time, i.e. after the crucifixion of the Lion. It is very clear that the family branches were divided into two big groups, one with a coat of arms displaying a chequered falcon, one with three moon crescents.

During Pope John XVI's pontificate, as an example, the pope removed the Hungarian pagan Prince Géza aided by the power of the **Crescenzi** family.

The struggle was about religious and political power in the world and the Holy See was, and is, at the centre of power. In the year one thousand the coronation was about Jesus Christ's thousand-year realm and it was Saint Stephen who was crowned king on December 25, 1000, in Hungary. Here it was the Crescenzi family led by the Holy See who defeated, among others, the Falcon and Bull Otto III.

The last pope surnamed Conti was Innocent XIII, 1721-1724, while the family name Crescenzi appeared between 1817 and 1823, as Cardinal Francesco Crescenzi.

Bernadotte

Bernadotte

The Falcon god flew from **Tusculum** to Pau in the province of Béaru in south-west France and was reincarnated at Jean Bernadotte Julius and January 26, 1763. We can see that Jean Bernadotte had a typical bird's face, an eagle's face.

Here we can see the heads of an eagle, a falcon and a rooster and their beaks which characterize Jean Bernadotte. The eagle's beak is a bit longer and has a more powerful hook than that of the falcon. The rooster's beak is longer and straighter and does not have the powerful hook at the end.

Jean Bernadotte was a combination of a falcon and a rooster in a human body. To my understanding he belonged to blood group BRh-

Karl Johan Bernadotte was from the start called *Jean Bernadotte*, also *Jean Baptiste*, since he was named after John the Baptist who was a reincarnation of, among others, Julius Caesar and his symbol was an eagle. The fact that he got his name from John the Baptist was not a coincidence, since he was a reincarnation of Ptolemy of Mauretania. In the secret circles, both in the Vatican and with Napoleon, they knew that Jean Baptiste Bernadotte was a reincarnation of, among others, the Falcon god Horus.

In the secret circles they still thought that Carl Gustaf XVI was a direct descendant of Jean Baptiste Bernadotte. That gave him the right to commit any crime, unlimited. Now the world understands why the king managed my father's paternity issue.

The greatest surprise for the Christian world is that this king has nothing to do, biologically, with Jean Baptiste Bernadotte. He is a phony king, a false king who is actually not authorized to manage my father's paternity issue in connection with the Lion, Lamb, Bull, and Falcon. This is gigantic bomb for, among others, the Vatican and Washington. The outcome of the paternity issue is no surprise since we cannot expect a better, more human and more honest result of a criminal, stupid, arrogant ox with a featherbrain. The monarchy era in Sweden is over, it has to be removed before things start to happen.

The French Revolution was guided by the spirit and symbol of the Falcon god Horus, the Sun

The Falcon god's arch angel points his sword at the Falcon god's symbol. The Falcon's spirit guided the French revolution.

Above the sceptre is a crescent, a serpent wriggles around it.

After the revolution and era of enlightenment the Falcon god himself appeared in Lion Napoeleon's family. Now the world has a better understanding of why it was important for the Vatican that Jean **Baptiste Julius** Bernadotte, ascended the Swedish throne.

Mark Antony, contemporary coin, and Karl XIV Johan, also contemporary coin. If we compare these two coins and disregard the fact that 2,000 years have elapsed between them, we notice that the skull structures are similar. We can also say that about the structure of the nose and the angle between the forehead and the nose. What is more, they both tie their hair in a knot. Both have bird-like looks and therefore we can conclude that Karl XIV Johan was a reincarnation of, among others, Mark Antony.

Carl Gustaf XVI

Ptolemy of Mauretania
Jesus Mammon;
"The fourth creature looked like a flying eagle".

Carl Johan XIV, king and head of state of Sweden and Norway. Jean **Baptiste Julius** Bernadotte,

Carl Gustaf XVI

The fact that Carl Johan XIV got his name from John the Baptist (Jean Baptiste Bernadotte) was not a coincidence, since he was a reincarnation of, among others, the Falcon God Horus, Mark Antony, and Ptolemy of Mauretania. In the Vatican the Holy See knew who Bernadotte was and wanted this Jean Baptiste to ascend the Swedish throne at any costs. Napoleon, too, knew about Bernadotte's origin. Then they believed (and still do) that King Carl Gustaf XVI is a direct descendant of this Jean Baptiste Bernadotte. His complete name has developed from Jean Baptiste Jules to **Johan Baptist Julius**.

The king himself believes he is still a direct descendant of Jean Baptiste Bernadotte. That is why he is allowed to commit any crime and to do what he likes in the Kingdom of Sweden, he acts like a god. The victorious V sign in Victoria means that he believes he can defeat all those involved in my father's paternity issue, he will win. He can forcefully influence the government, e.g. the Department of Foreign Affairs. He chairs the Advisory Council of Foreign Affairs and can order, for example, the recognition of Palestine on **October 30, 2014** (he does not stand alone here, the time is not yet right for a recognition). This diverted the attention from the court in Sweden to a Middle East focus. But which are the consequences? A stubborn, stupid Ox with a featherbrain who does not think farther than his nose since he is a phony king, a false head of state. **Time is ripe for a Swedish Republic, a rebirth is necessary.**

At *Man, God and Science*, page 10, I claim that Carl Johan XIV was not Oskar I's biological father. But his father was of the Bernadotte family, his elder brother Jean **Evangéliste** Bernadotte.

The pictures above prove that that Jean Henri Bernadotte's first-born son was Jean Evangéliste Bernadotte, and the latter's biological son was Oscar I. This means that Jean Evangéliste Bernadotte was the progenitor of the Bernadottes, not Carl Johan XIV. Jean Evangéliste Bernadotte was a reincarnation of, among others, John the Baptist who was a reincarnation of Julius Caesar whose symbol was the eagle. But his younger brother, who was a reincarnation of the Falcon Mark Antony and Ptolemy of Mauretania got the byname Julius. Mark Antony was now and then Julius Caesar's secret rival, but in the Bernadotte family they became brothers named Jean **Baptiste** Julius. He did not become a lawyer but was intensively interested in military issues. On **September 3**, 1780, he joined the army as a private of the Régiment de Royal la Marine in Corsica. He was a very devout Catholic, something his brother was not.

Gustaf Adolf VI, 1950-1973 Carl Gustaf XVI, 1973 -

The Swedish Parliament can ask for a DNA test regarding the king's origin. This test will clearly demonstrate that Carl Gustaf XVI does not descend from Jean Evangéliste Bernadotte or Carl Johan XIV. A DNA sample can be collected from the remains of Jean Evangéliste Bernadottes and Carl Johan XIV. They can be compared to DNA from Gustaf Adolf VI and Carl Gustaf XVI. The outcome will be one that is reflected in the pictures above. I maintain that these are the blood groups of those involved: Jean Evangéliste Bernadotte "AB", Carl Johan XIV "B", **Gustaf Adolf VI, "AB"** and **Carl Gustaf XVI "A"**. – The reason why Desideria, wife of Carl Johan XIV, left Stockholm was partly that she was very worried that her son, Joseph Frans Oscar's (Oscar I) father was her husband's elder brother. She did not want to be involved when the bubble would burst and destroy the monarchy. This was Queen Desideria's greatest secret. The lawyer Jean Evangéliste Bernadotte died in 1813 and was reincarnated straight into my family tree on **November 5**, 1884, named Simon. On **November 5**, 1810, Carl Johan was adopted by King Karl XIII (this is also a sign...). Vitéz Kemény Simon's first-born son was called Zoltán Kemény. He studied at the Military Academy **Ludovika** in Budapest. He also studied law and became a lawyer. Vitéz, Doktor Kemény Zoltán ended up in London in 1945 after the war. He worked there as a lawyer to 1949. Then he and his family moved to the USA.

The eagle (Napoleon/Julius Caesar) and the seven stars, the Plough (the Dipper)

Napoleon's eagle was a symbol of Julius Caesar and the 7 stars refer to the 7 congregations in Revelation, to be focussed later on in the Vatican, in St. Peter's Basilica. This connection led to my father's arrival in Sweden in 1956. It also led King Gustaf Adolf VI to classify my father's paternity issue on March 30, 1966. No legal motivation was attached and the king was not authorized to be king of Sweden for reasons of heritage.

It is now time for the king to start looking for his origins since he does not belong to the Bernadotte family any more. I have already found his origins.

By using anthropology analogies and comparisons between the two families Bernadotte and Zähringen we can fairly clearly see that the Swedish royal family is part of the Zähringen of Baden family, from Germany, not the French Bernadottes. There are no biological traces in the Swedish royal family to connect it to the French family. If we add a DNA test, the result should be the same. It remains for the king to prove the opposite in order to maintain monarchy in Sweden.

This anthropology compilation clearly demonstrates that from Gustaf Adolf VI the Swedish royal family are part of the German family Zähringen of Baden. This makes the Swedish monarchy illegal according to the constitution. The king can forget the signs of victory, "V", in Victoria, he will never be a winner.

From 1950, with King Gustaf Adolf VI, the Swedish dynasty comes from the Zähringen family of Baden, Germany.

All those involved in the secret circles believed that this king was a direct descendant of the Falcon god Horus and John the Baptist. That is why he was allowed to secretly handle my father's paternity issue and could commit many crimes without any obstacles. He is the son of crime, an arrogant animal in a human-like body. He is also a disgrace for all humankind on this planet. France and Germany also take an interest in the disappearance of the Swedish monarchy.

Enki, Worldly Adam

It seems as if Enlil, Gilgamesh and Inanna wanted to remove Enki, An's first-born son.

Three of these call themselves Jesus, the Jew who was crucified...

As early as in Sumer, at the time of the Father of the deities, An, it was decided that the final goal after these 7,000 years is to transform animal blood into human blood. His closest sons were Enki and Enlil, their first-born children were Tiamat (hybrid), Enki's son Marduk and Gilgamesh/the Bull. They were elected to compete for who would succeed to become a human being again. We can read about this competition in Revelation. His son would be who succeeded in transforming his blood into human blood.

Enki/Djoser/the Scorpion Man (whose symbol was an eagle) and Marduk/Khufu/the Lion had organised rewarding, gigantic biological activities during Dynasty 0 and 4 in connection with the blood transformation process in ancient Egypt. But the Serpent annihilated their efforts and everything concerning blood research was ruined. Even the trials by Gilgamesh-Osiris (then named Pharaoh Userkaf) during Dynasty 5 were a total failure. More info at *The Fourth Pyramid which Disappeared*, pp 1-22.

The Serpent/Inanna and the Eagle/Falcon also tried to become human again, but they failed. Serpent have a research laboratory on the far side of the Moon, more info at *Visitors to the Moon, final*, pp 79-80, and Chang'e 3 discovered an even more modern laboratory on the front side of the Moon, in Sinus Iridum, see pp 68-70.

The problem is that the Father of the Gods, An, is getting older and now he needs a new human body with human blood. But none of the candidates managed to become human again, so we understand his wrath in Revelation. More info at *Man, God and Science*, pp 34-42.

 Jesus Mammon;
 The fourth creature looked like a flying eagle.

The pope (Moses) who darkened the Christian religion assisted by the Swedish royal family and Church of Sweden after the murder of the Lion Tibor E in Sweden in 1971 in connection with my father Tibor Kemény's paternity issue. The Church heralds one Messiah instead of four. Who is your Messiah?

And Now Sunset

The Sun at a Disadvantage

THE NEW SOLAR SYSTEM

The Ultimate Day

- 502 Sooner and later you will see great changes made, dreadful horrors and vengeance. For as the moon is thus led by its angel the heavens draw near to the Balance.
- 503 The moon is obscured in deep gloom, his brother becomes bright red in color. The great one hidden for a long time in the shadows will hold the blade in the bloody wound.
- 504 The year of the great seventh number accomplished, It will appear at the time of the games of slaughter: Not far from the great millennial age, When the buried will go out from their tomb.
- 505 The present time together with the past Will be judged by the great Joker: The world too late will be tired of him, And through the clerov oath-taker disloval.
- 506. When twenty years of the Moon's reign have passed another will take up his reign for seven thousand years. When the exhausted Sun takes up his cycle then my prophecy and threats will be accomplished.

A light phenomenon in the shape of a 7 rainbow

The End is near. Global climate change is here because of the binary star system. Our solar system contains two suns orbiting each other and one of them is now at a disadvantage. The 7,000-year long reign of the Father of the Gods, An, is approaching its end. The number 7 is a symbol of his long reign and also a symbol of for the coming 7,000 years. The closer the comet, the neutron star comes, the faster the planets orbit the Sun. The Earth, too, will experience a change of its level of vibration and due to the acceleration time will also increase its speed here on Earth. This is also a sign of the neutron star's presence in the solar system. We all know that time passes fast, now you know why... See also **page 74** which is also very important. The End of Time

Dan 12:4 and 12:13

" But you, Daniel, shut up the words, and seal the book until the time of the end; many shall run to and fro, and knowledge shall increase."

" But you, go *your way* till the end; for you shall rest, and will arise to your inheritance at the end of the days."

Finally:

5. Jesus said: "Know what is in front of your face, and what is hidden from you will be disclosed to you. For there is nothing hidden that will not be revealed." Jesus, too, wanted all secrets to be revealed to bring knowledge to the world.

10. Jesus said: "I have cast fire upon the world, and look, I'm guarding it until it blazes". **16. Jesus said:** " Perhaps people think that I have come to cast peace upon the world. They do not know that I have come to cast conflicts upon the earth: fire, sword, war."
